## **Reddog Introduction**

Eclipse, is you seeing yourself having come back out of a rabbit hole; that, was a certain movie; of, lemmings having been stopped; from, all running over the edge of the cliff together; stopped, is the collapsing dollar; and, theft of your property; stopped, is martial law; all, certainly a path of what's unfamiliar;

You, demand debt free constitutional money now; and, common law; you, demand a child be given fathers' rights; you, demand the ability to void a void court order; immediately, be put back; and, you care to provide a check and balance on government; with common law as you should;

This, is happyface's verifiable claim; appointing, you as a trustee; to, fulfill happy face's verifiable claim; happyface, is asking you not to come from an office of profit during this time; for, this rainbow prophecy you read about is about this social change; where

A, moratorium is put as a notice; to, the provost marshal; to, stop harm now; you, care to turn things around; for, this is the time of a feather and a hammer floating together; rather, than just what you know is existed; that, isn't egalitarian;

You're, given a path forward to clear away what's not useful; via, solar and lunar total eclipses coming up; such, act as an engine; a, pairing of celestial events; happening, in the heaven; with, such a movement as eclipse; all, clearly see; as, the celestial moments are coming evermore toward us; all, form central hubs as masts;

Applying, social media sites; you, centralize and tabulate; yes, verifiable vote; and, notice given of such a moratorium be to the provost marshal or equivalent in government; to, be delivered to the governments with an order to take a break; in, making any policy in banking for one year; really, one year minus ten days; which is the

Time, between total lunar eclipses; from, january thirty first two thousand eighteen; to, january twenty first two thousand nineteen; and, during such time all are requested to learn how current is created; eclipse, is produced by you carrying out instructions; you, are connected with herein about; after, this moment; so such

Action, is forwarded; and, is tended a tick the box yes is paired to movements of eclipse in the heavens; all, most on the earth can see and know about; is, a natural ideomotor dynamic; activating, and triggering all beloved's sensory anticipated observed actions toward eclipse; are, paired with such external happenings simultaneously;

Eclipse, action is with each eclipse moment; and, between; all, via such inducted entrainment; you, can look within; and, read between these covers of the path of hollow bones; such, presupposes you've got this message out of eclipse; and, actions taken achieved eclipse's outcome;

This, is an induction herein given to you in the path of hollow bones; you're, provided with a specifically designed by direction association; between, what you see as celestial events; and, actions taken by you and i during this time; you, verify a vote; for, such a moratorium; you're, saying stop;

You're, saying no to this present system; many, care to be free of; once, and for all time; obviously, such ideomotor conditioning is a focus within the other than conscious mind; and, by-passing conscious objection; such, exists where all habituated learning memory and behavior; toward, eclipse's impact; is, an impact coming from your right hemisphere and brain stem co-operation; with, your left hemisphere;

Wakefulness, is only of a limited phenomenon; whereas, i awareness as you read herein and learn; is, beyond a wakeful state of being; for, wakefulness itself is only seven plus or minus two chunks of information; and, awareness as you will read is beyond dreaming and deep sleep; and, therefore

An, unwilled and other-than conscious alignment; is, being simply triggered; by, such participatory imaging of these celestial events; as, eclipses paired to actions taken on the earth; eclipse, is being paired to an engine in the heavens; assisting, all as an induction into taking moral ethical action; and, ridding the earth of usury once and for all time; such, a simple thing; yet, the roof needs to be fixed; and, not just rearrangement of furniture in an upstairs room;

No, pigeonhole exists at the clerk of courts; at, the federal court building; today, in phoenix; eclipse, is triggered by such celestial movement; as, you tick the box yes you want reform in banking; and, by doing such you're saying; the, present system is doing harm by negative economic inductance; and, you're stopping that; okay?; now;

Many, current lead-whores are requesting debt free currency; and,  
even kicking usury out the door as immoral and unethical; for, all it's  
being known as peony; where,

You and i as beloved being traded under commercial law; which, is  
not the law of the land; all, crimes committed to happyface and  
dakota have occurred on the land; and, this is not the law of the  
water; that, can be applied for a commodity;

ECLIPSE

Eclipse, and ticking the box yes you want reform in banking; is, not an involuntary reflex; not, bound to any expected attention reduced; nor, of your or my focus either; yet, ubiquitous constructive ridding of usury; and, it's fat taker effect; called, in these books the wasi'chu effect; which, is a behavior; and, not some beloved; and, such was called by the originals here on turtle island;

Eclipse, was by this bio-directional association; between, getting a verifiable vote; and, handing such a count in; of, a notice; from, centralized hubs in your cunt-tree; to, the provost marshal or equivalent around the world; before, the goal lunar eclipse begins the moratorium;

On the twenty third of january two thousand eighteen; notice, is given that on the thirty first of january two thousand eighteen; in, the lunar eclipse between; demand, is for government to take a break from making any policy in banking for one year minus ten days; which, ends on the lunar eclipse; january, twenty first two thousand nineteen;

Your, job is to reinforce what you learned in this path of hollow bones; of, a perpetuated instruction to you herein given; such, an act affect association; is, of an inducted entrained sympathetic resonance; created, over the earth; the, path of hollow bones automatically spread; and, triggered by instructions given to you herein;

You, form centralized hubs and masts; to, focalize and centralize; all, achieve a verifiable vote to have a reform in banking; usury, is ridded once and for all time; so, you, read between the covers of the path of hollow bones; and, you learn about a future of lifehouse sustainable community; lifefood agrarianism; gender egalitarianism;

The Path of Hollow Bone: vol One **Eclipse**

Especially of course economic egalitarianism; you're, about what's familiar to you; what's, multiple layered recruits output praxicon; and, long term mnemonic neurology; for, anticipation; kinesthetic auditory and visually;

A, perceptual code; of, celestial movement; is, paired with the movement executed toward obtaining eclipse's outcome; where, such is transcended into collecting such a verifiable vote; and, all such is being triggered via passive perceptual conditioning; brought, about by this story between the covers of this path of hollow bones; and,

Eclipse's physical characteristics of light and dark; you, clear away the past to make way for what's new; you'll, really enjoy this volume one; and, i'm sure you won't be able to put any one of the other volumes down either; until, all are finished; i, am the red dog; and, i has spoke;

## **Chapter: One**

### **The Path of Hollow Bone**

#### **Visioning: The Vision Quest**

The vision quest is, a great tradition amongst the originals here on turtle island grief, and suffering; is, the most maturing of all emotion; for, this really is about your ability to integrate what's lost; such, a suffering; can, have caused you to come into a solemnness; of, one's totality;

I, am red dog and i will speak; i'd, see in happyface's own solemnity; of, totality; for, such a quest in this vision; of, the path of hollow bones; and, the ability to be observed to see what occurred; even, to go into the year four thousand twenty-six and look back a couple thousand years; such is a tale;

Unfolding here in this path of hollow bones; various, visioning ceremony; as, one who walks across the sky you would learn about; all, is put in here as metaphor for you; you, can live life more abundantly; yet, without such a total solemnity; you'd, probably not quest for a vision; and, have and a proper treatment;

You, could've done such; yet, happyface was trained by Cloud Two Children; an, original of turtle island you'll learn about; suffering, worth is quested life; of a mind, emptied out; and, shape taken; that, you can feel light in the body; to, see in the mind's eye; and, such a vision can feel for you; for as is this

Vision, was given happyface; of, the presides being a moment in this time coming now; and, many years ago prepared for the day; hard, is it the nights; and, days for as long as for you can be without water necessarily much; and, not have any food at least; you, could be alone;

You, could be in a vision pit that's made inside a hill; and, happyface would go to where the originals had lived; even, hiawatha; and, this meant often staying at the top of a hill somewhere; or, under some embankment;

## One Day i Found Happyface

You'll read about; under, a waterfall; you, can imagine thirty gallons a minute on your head everyday; for, six months; might, clean your brain; as, reading this path of hollow bones; is, cleaning your brain; awakening; an, experiential questing for vision; ongoing; was, it that such a challenge be; often, you do Wakan's work and, you can be more personally attacked; and, you can be retaliated against;

You're, participating in protected disclosure and conduct; of, official misconduct; as, happyface has been; and, you can be retaliated against; you, can have your child taken; and, your child slowly put to death to get you to shut up; to, answer; you, can look into yourself very deeply; the, whole universe is flowing inside; such, a life; of, a road less traveled;

This, path of hollow bones you've picked up; is, really for your seeking; that, when you put this down you feel; oh my god; maybe, you can not find it easy to put it down; for, i don't know but this is very practical; about, life; and, yet for the beloved (living being) of turtle island; happyface, be amongst such a tradition; be, such for you to come learn how to vision;

I'd, find happyface educating beloved about lifehouse sustainable community; which, you're going to be learning about; you're, going to be learning about a tradition that's really ancient; called, the toltec tradition; of, a medicine path here on turtle island; you're, gonna be awakening to the bank being inside you;

## **Eclipse Mission Restores Common Law**

Directing, currency; and, how eclipse is present to assist bring back common law; which, has as you're becoming aware here; possibly, has not been present; that, no pigeonhole exists; at, the courthouse; for, a verifiable; non-controvertible claim; involving, constructive agreement got privately between the parties; to, void a void court order; yet, as happyface has found; no, pigeonhole exists; for, the service of an independent third party witness; who, is a man or a woman; in, an office at court;

This, story is a little about that; and, how law all comes from what's spiritual; and, you only can join like with lie; you, can't join whats living to whats dead; and, family court you're going to be learning; is, just a joining of the dead with the dead; that, a child can have been traded;

No, oversight exists in the judicial process; at, the moment; for, common law; is, brought back via eclipse; which, is a movement; to, form central hubs around the earth; beginning, in the release of this path of hollow bones; masts, form in central hubs; from, august onward in two thousand sixteen; to

Coincide, with the Perseids meteor shower blitzing the earth; that, leads up to the total solar eclipse; on, august twenty first, two thousand seventeen; as, marking out eclipse; the, beginning of a count; a, count of a vote; a, tick the box yes, you want reform in banking; or, not; simple; this is a moratorium; for you

Tick, this box yes; you're, saying you know harm is being done by the present system; and, the government needs to take a year off in any policy regarding banking; for, one year; whilst all learn

How, currency is created during this year taken off; on, the twenty third of january; two thousand eighteen; one, week it is before a lunar eclipse; masts, print up a notice; and, give such to the provost marshal or equivalent; and, that such a vote is as a number; all, be put to the provost marshal's office as notice;

### **Study Circles Formed Around The Earth**

Central, hubs are formed to centralize evermore verifiable votes; brought in via social media accounts applied; and, on the very first total lunar eclipse; on january thirty first; two thousand eighteen; which, is of the moon; and, would be seen almost all over the earth; and, is the marking out of a moment of eclipse; which

Extends to the next total lunar eclipse on january twenty first; two thousand nineteen; and, governments then be able to again make policy for banking; for, within the year that's taken off; all, have learned how money is created; and, become awake to the practice processes;

Having cleared away usury wherever slavery exist, monopoly or any unfair practice exists, once and for all time; and, cleared away an idea that money can have only been made from debt; which, seems small i know; yet, greater things come ever from a bank inside you directing currency; yet, at the moment the corpse can't really feel hear or see; and,

You and i can't really have a relation to that corpse; so, that is not a proper situation; no, informed consent up to this point up to eclipse; only, an illusion; and, therefore; before, eclipse has its total effect after january twenty first, two thousand nineteen; that, common law is the check and balance and government cannot have existed before eclipse;

This, work is about getting rid of usury and negative economic inductance; once, and for all time; and, perception directing currency moves toward clean energy; cleaning, up the pacific; recopying the treetop; a, squirrel can run from florida to maine again on the treetop; without, coming to the ground;

In going forward you learn about golden ages of the past; how, the earth was twelve times smaller than it is today; how, the density hasn't really changed much; yet, it's volume has;

Much lands have subducted and raised; and, many beloved living near the coast in the past; perished, when there was calamity such; sometimes, ninety percent;

## **Learning About Integrated Behavior**

You, can learn about clean energy from plasma; from, devices such as a radiant energetic dynamo; and, this is in a time of a feather and a hammer floating together; you, may be excited to learn about inverse gravity; being, a component of magnicity; there, is a magneton; not, an electron; that, describes the electron effect observed;

You, go into this you can be aware that blood is formed in your intestine; your, cell is not the original building block; colloid of life is; you, learn about what integrated behavior really is; this, is a tale; which, for me begins a long time ago; in, the everglades; it's, really a vision of hiawatha; also, how happyface would be given some inductions; into, what is within this work; from, cloud two children; that, you'd learn about;

I've, traveled ever since; and, met up; and, such is it that this work

of hollow bones is before you; ten volumes; written, in a single moment; connecting, in and being with happyface; and, many braves; and, this, is a tale of land; through, which is flowing water clear; and, of streams; gorgeously, shaded; under, old growth great trees;

i'd, meet happyface in places you could go where berries and fruit grew wild; i'd, meet happyface in the spring; yet, even cold and bitter winter high up in the mountains; collecting, white gold to put into product; from, hot waters close by; even, in such an icy winter condition; i'd, often not know whether it was winter or summer; a, living environment so perfectly adapted; you, could find happyface anywhere in an environment like this; living, as a fat cat; such, an up springing of the country so beautiful;

Stars and the moon and the sun and the earth; and, upon all animals and birds; i'd, see all give such affection; sometimes, even birds you'd see grooming braves;

## **The Power Being From The Land**

This, is the earth upon where law is of the land; and, law is also being put forward to govern commerce of commodity; and, to govern dead items; and, issues that are dead; yet, such a process is what has come to be put over all beloved here; so, figuratively happyface talks about pulling the plug on the high water mark at the top of the mountain;

After, eclipse that water mark returns back to the shoreline where it's supposed to be; and, the earth upon having water risen; above, the water; the, earth be created such; a, law of the land very simple; is, the heart's path; you're, learning about; and, it's arriving and returning to a vision about hiawatha; this, work is about; better, having this happyface inside you; than having a roger or ralph or sally or jay;

You, can learn about whole brain functioning; and, verbal and non-verbal patterns that allow us to live in the whole of ourselves; and, how these coming events in the heavens; for, the presides is only going to occur again in one hundred thirty three years; such, coincides with the release of this path of hollow bones; which, as we release such will be free; for, a moment in time; so

Let your friends know about such a work; this, relies on you to do your alming as you can; for, you're, drawn to assist with this alming of eclipse movement; and, awaken more to i awareness; and, what i awareness is; the, heavenly event; strange, attractors assembled;

As, engines drawing us forward into taking action; for, none can say that a hand doesn't exist above the government; none can say harm is not being seriously done; it's, a very important question that needs to be asked; this, is by popular sense of languaging; a, way forward for us; to, avoid a collapsed dollar; and, what has come from being under a system of negative economic inductance;

## **A Real Reset Clearing Away Monopoly**

Where, a monopoly has owned the currency; and, a corpse; which, can't feel or hear or see; has, been put above you and i; you're, going to read and hear about iktome; and, coyote; and, ALPHABET SOUP LAND (agency known by their initials FBI. CIA etc.); how, the sky was pushed up with lodge poles; and, how the bears taught everybody how to put cold and warm in the earth and store it; to, be drawn out in time for use when needed;

Chapters, can show you common elements which run through the path of hollow bones; which, is really you and i having got rid of usury; once, and for all time; this, is the night; that, you and i we drove such usury out; and, also negative economic inductance; this is the living reality; of, a story unfolding; i'm, listening to as you; nearly, not is such a form; of, not purposeful structure; yet, primitive as a savage living;

This, is the night; you and i, we drove old dixie down; and, in a millennium to come; for, many centuries ahead; all, learn how to leave the earth behind; same way they found it; four thousand years ago; and, ancestors of new today who is living; definitely, connect you with tradition; and, a set of values; including, a right to have a mother and father;

You're, getting an insight into a story about parentectomy; and, religious living only as a dead animal; and, a corpse can have only been above your head; for, how can a corpse hear your child cry; or, see a crack in the road; for, awakening; and, collectively all of us having not cared to be just love bombed; and, amused; yet be

Held, on the edge of your seat; and, edge-ucated; not, head-ucated; for, enjoyment; nearly, told; such, is ; for, story, metaphor and legend be; about, your arriving and returning;

## **Beloved Lost Their Children in the Past**

Common law; which, all had at one time; in, a federation of united nation; the, great iroquois federation; happyface is awakening all to life food agrarianism; and, gender egalitarianism; these, awakenings are all really to do with you becoming more conscious; for, all could've been just subliminal; and, the first sightings of ships by the originals;

Later, accounts such called here white long legs; and, those of the fat taker way; is, really about behavior not about you; and, how traders; missionaries; beginning, with young white males without parents; came, in foam houses (natives describing the ships); and, the displacement of traditional homeland; and, from a loss of children;

A, dramatic watershed encounter; such, as a battle of wounded knee; little big horn; yet., also such as the brave, (more recently) who was tracked and cut down cowardly on the highway in oregon; with, his hands in the air; who, was concerned highly that you could be innocent in this day; yet, be shot; in, this day things can drastically be improved; should be; so,

Stay tuned to this first work; which, you're reading; which, is eclipse; and, move through them as you can within a sequence; as, you may find a better flow of information; though, they can be read individually; anyway; that, you can find what's useful here you'd be urged to pass this on immediately; to, participate in the data and not just be a spectator;

This, is the path of least resistance; this is a time of a hammer and a feather floating together; magnicity, the entomological inverse gravitational flight of the beetle; and, you're learning about membrane permeability surfactant enhancement; and, life hydrate; which, are works; as, two works beyond these ten volumes; also, being released in this same time; this, is the time of the semi-colon; and, it's use; it's equivalent to a pause;

## **The Pen is Mightier Than the Sword**

You, get relief; for, such an idea; is, joined with an idea that comes before and after; for, such to make sense; and, nothing is the end; that, doesn't exist; only, arriving and returning does; so, a pause in this text; is, been written; so, as this text is read; this, information can be being absorbed more powerfully inside you;

You, have better recall; so, a pause is equivalent to a semi-colon; and, a conjunctive word; you, have a comma; this, is been written in first tense; in, singular; as, much as possible; and, what's, first is first and second is second; sequencing, of the senses are kinesthetic auditory visual; with, a

Focus of what embedded commands are that's been given you; a, sophistication is applied; beyond, what's ordinary; i, hope you're excited as i am; for, you; to, look inside; and, awaken mastery; ever, deeper more now; inside you; okay?; i's, the red dawg; and, i's spoke; and, all braves that were listening; all, in unison said; aho, red dog; you, has spoke; aho, mitakuye oyaasin;

Few, is it that could ever have knowledge which happyface has; and, has had the persistence and perseverance to have sat with emperor for three days; to, have learned everything the emperor knows; and, to have added these three things on; many, asked happyface; what, made happyface feel; and, the

Emperor would listen to happyface; and, happyface replied; “it only takes a small spark to have burned a whole city down; and, even the largest animal; is, afraid of the smallest; like, a spider; you, live what you speak and speak what you live next; and, every single word you use has a physiology”;

The Path of Hollow Bone: vol One **Eclipse**

That you're reading this you're grokking this; you're, getting a healing therapeutic metaphor; i awareness; having, cleared away stockholm syndrome; in, the east everyone is taught they're not the body; in, the west everyone is taught you are; i, is empty space; and, am is caring as matter; as, the body; and, fifty percent of yourself is eternal and was never born as i;

The other component of yourself is your body; which, is born and would die; and, this is matter and what you care about; and, in a fifty fifty relation; this, is balanced being; you, can read on about the syntax; of, the preferred modes of sorting information; allowing, you to live in the whole of yourselves; versus, limited mind function;

You're, gonna learn how interest and pleasure stimulate whole brain functioning; more, importantly you're gonna take a look at the parentless state of affairs at the moment before eclipse has had it's effect; the, path of hollow bones is about the path of least resistance; and, eclipse is about a moratorium;

## **Chapter Two: Parental Child Alienation**

### **Loving Your Child For What This Is**

Parents, both; by, being loved; loving, your child for what this child is inside for self; and, that desire to love; can, have been spited with hate to a parent; as, manipulation is of children; and, at this moment little to be not any oversight is existing; generally, a child is manipulated to hate;

In some extreme cases; even, rejection of the parent that's been cut out; and, in situation of evermore extreme; is, a sign; where, such a one sidedness exists; as, in the case of dakota, happyface's son, being cloistered; and, the child's expectation; is, as a created identity;

A, parental condition bolstered; to, create more maximal effort in relatedness; and, in the condition of dakota; who, has been cloistered; and, was illegally shipped across state lines; and, never has had permission to be there; father, never cared for dakota to be shipped out;

Nor, should anyone care to uphold the idea; that, someone else should parent someone else's kid; you're, living in a day where no verifiable claim exists; for, no legal title exists; to, a corpse for property that it did not make;

Dakota's, life; a, parent loving is capable; was, lost; for, all these years; a, parent targeted; of, rejection; emotional, of a child; is, the result of such modern denigration; which, is rife in this day; no one, was to; who, took charge of dakota; was, to ever consider the best interest of dakota's care;

The Path of Hollow Bone: vol One **Eclipse**

Only, those could put things in terms of their own interest; don't, tell me that happyface is not seen as evil; and, demonized by the surrogate parents; Who, have never bothered to connect back with any response; and, have just continued to abscond; and, run along with their being no claim; yet, no enforcement that there is no claim; verifiable;

A, parent that's alienated; as, happyface; is, rarely available to a child; to, reconnect; a, method of adversarial alternative constructed alienated; child, and parental conditioning; is, found in the modern life today; happyface, was targeted; so, was dakota; for, dakota to be thrust away from his extended family he had; that, was built;

Quality of life far better; better, nutrition for sure; no, verifiable claim exists to have done so; that's, very wrong; many, years have passed by; you're, living in a cunt-tree where you can't void a void court order; that's, what this story is about; yet, it's really bout yours and my right to our property; which, is the ability you and i to lift our own arm;

## **Recognizing Fat Taker Behavior**

This, work is really about a fat taker effect; of, parentlessness; to, have lost one's way; to, become rudderless; it's, widespread that behaviors are come about; because, of that sort of behavior going on; like, substance abuse; not, feeling chipper for instance; trusting, of a great love; and, a hatred of self generally;

With, an esteem that's self lowered; and, documented well is it; that, children that have been alienated from their parent; generally, have pretty disastrous behavioral effects; basically, all based on a false idea; that, on apparent is evil; so, self-hatred is the big disturbed affected condition;

After, eclipse a child has an unthreatened and loving relation with both parents; no, justification for such abuse or neglect ever was; to, have ripped dakota's father away from him; anyway; this, is a story beyond just what's gone on with happyface and dakota; it's, really a story about a movement called eclipse;

To, stand up for your right; that, government protects your property; which, happyface's property hasn't been protected; and, there's no way you can void a void court order; fence-sitting; is, what happyface has seen most everybody do; pretty, alarming as far as most just being a spectator; maybe, to the alienation of child suffering; and, the parent; and it's a real rare

Thing, that anyone is really gonna be listened to much as a parent on that level; and, ignored often whatever wound did exist; this, culture response is to stuff it and get on; a, spirit that's seriously mean; ye, be subject to in this modern day; and, this story's about such; yet, more;

Grief, is really one of the most maturing emotions; and, deep grief is around child and parental separateness; it's, just an indifference; an, attitude; that's, what's really going on; with, the dakota

co-guardian condition of cloistering;

A, risk to have remained as a child alone; isolated; alienated; and, beyond a cut feeling; a, parent alienated; is, not an uncommon type of atmosphere; going, on right now; services, that we're being given right now; are, not proper services; and, that's what this is about; alright?

## **Ambiguity Creates A Rudderlessness**

Many, apparent professionals happyface is connected with; of, dakota's condition of kidnappedness; and, cloisteredness ongoing; and, an alienating of parent; responsibility, today's diffuse; and, target; of, fear; that, apparently that sort of being is normal; the, abuse perceived; really, is from a lack of empathy; and, reticence to act; and, you can generally say where someone's like that there's a really ambiguity going on; and, you've got a real fence sitter type of effect;

Family court; and, this present society; directly, taxed a child's father; incentives, to go after the father; to, collapse the father's business; and, that's the story; all, done to happyface was by default judgment; and, wasn't allowed to be able to say anything; you're, not; you're, muzzled;

Someone else apparently says something and put it into code; anyway; this, is a story about you and i having re-gested the property you have to your child; ands, a fat taker is a parentless condition; and, this work is about that basically; and, a movement to tick the box YES You Want Reform In Banking; and, have moratorium in banking policy for one year; whilst, the earth and everybody;

Learns, how currency is created; dakota, has a form of child abuse that's unrecognized largely; it's an alienation of a child's parent from that child; and, above all else your actedness and influence; of,

what's natural; those, you can assist; to, have a power and a potential that's great; yet, not to act is an act;

Not to speak is a form of communication; even, a self is an evil of face isn't silence;

## **Applying A Path of Hollow Bone**

I, am red dog and i will speak; Grief; the ability to integrate what is lost; sorrow, of the beloved; of, the fat taker rejected; despised, is this father; the, family slaughterhouse; you, have only been a lamb to; as, a father; you, are brought your son won't have his father's' right; the, father's mouth; is, not opened;

He, ye afflicted was he; and, oppressed was he by a black frock and wig (court system) of, an entity having been put above your and my head; nothing, ever was put in the child's best interest; up, until this time; saved, are you; unto, come to how; know, may you this hollow bones path (the path of least resistance); a, way shown you of redemption;

You, reject the fat taker effect; and, spend; Wakan, isn't in need of you to have to look at the snow and the rain; that, bring forth from the cloud; that, came from a river; moved, from a valley; between, the mountains; animals, and plants and all sentient beings be of a mutual lived assistance; live, in symbiosis;

Your, blood is made in the intestine not your bones; and, a colloid of life and a lifecolloid is the building block of your body; not, a cell; electricity, doesn't exist; magnicity (magnetics) does; how, about moving into a time of a feather and a hammer (inverse gravity) floating together? an, unreserved having let go; to, be with your

Spontaneous, creative intelligence; stillness, silence, and

transparency; is, i awareness; unbounded, eternal; can you use your spontaneous creative intelligence?

Learn, to apply i awareness so challenge that can exist in relation and family; communication, is improved; i, awareness is where no mental construct exists; you, don't have a purpose to be here; that's silly; you, don't have to have a purpose to be assured of some gaining something;

You, have to have cleared away what's not natural; you, don't have to go over what's natural; that, is; the, language of peace and ionophoric theory (positive and negative charge of ions) that's discussed and applied in these volumes; is, applying therapeutic metaphor; you're, getting as you go through this material in these volumes;

The, restoration of the son be given back his father; in, flesh blood and warmth; and, not some cold condition that's not heaven here; run, over by those who say you've got to trundling somewhere to get to heaven; and, would've preferred to feed your kids flesh of a pig maybe; this, work is not about something growing and creating more and more attrition; absolutely, not; much, is evolved; and, needs to einvolve more;

Can, you know if the roof is leaking attention can be to that? As, attention is to things like sweeping the floor; this, is a work about having perception direct currency; and, not the insanity of putting it all behind a war machine; and, nothing behind basic education; just, basic things of sanity versus insanity;

Can you acquire the diligence to be able to be inviting?; can you stick with fact and not doctrine?; can you awaken and stop all this ten thousand teachings?; can you have spirit within you of this awakening? cause, this is you educating others; not, something out there doing the teaching or something; is, a model for you those who are loving of self?;

In, i awareness; from, emptiness; and, care everything is done; and, this is neither unwilling nor willing; it's, about your having

stopped your thinking; turning, your mind on and off; i, was one day present to hear an a-turn-on-you ask happyface; “is, there one law?”;

Happyface, said “yeah; there, sure is; it’s the law of the heart’s path”; from, stillness; from, silence; from, transparency; what’s, supraliminal can come in; no, mental construct was other than allowing such to exist; with, this spirit; you, know you are this i; of, perfect detachment; of, a blending of your heart and mind; with, Wakan (what is Holy);

Thy, is serving this servant’s servant; and, it was happyface; unto this be said; and, if considered the possibility of another principle; i’d, say it would be self thy is neighbor; thy, love in how you keep self company; this, is like unto this first great principle; let, all have safe harbor; and, give all free passage; if, you don’t do that; you’re, not obeying happyface's commandments to you;

A, wo/man or any beloved is of this law of the heart’s path; which, all hang; including, these two commandments happyface is giving you here; Wakan, i am loved of; i, loveth inside; and, am loving; this, is not something outside; given,or received; it, cannot be; this,is you loving inside yourself; you, love yourself; you, love me; and, you’re able to remain integrated with instructions that you’re being given here;

Happyface, in you is what is integrated and associated about you; loving, of yourself and how you keep self company; and, you’re obeying Wakan that you are with what’s mutually beneficial; and, focused on what is a better way; and, all you can do to have chipped away at what’s other than this;

You, can gain this by being rewarded; and, not having others run around like you gotta fear punishment if you don’t obey; it’s, just be empty; don’t go around with something in your head; come, to council and be empty; and, you can get things done; glory, to you is eternal; your, reward is great; for, seven generations of children through you; you, model; such, windows into the future; of, eternity yet even is of wonder;

You, as this beloved of a heart into such is entered; yet, perhaps not yet; nor, can you have felt or heard or seen; which, this is beyond what you have experience of; for

Awareness is beyond your experience; and, beyond the other three states of being; there, is nothing between you and creation; all, else is fairly dichotomous thought; and, a mental monster; unneeded; you, are creation so you're not looking at someone like your own image getting ruled over and run over; god, isn't a him or a her; god, isn't exclusive of some gender; and, a rose has no apparent interior of itself;

### **Can, A Polar Bear Know About Crickets?**

No; do, you have to be given something for someone to be here?; like, you're special and you were given the day and the night?; no; it's, simply you and the day and the night; nothing, need be given; that, a father christmas is up there in the sky watching over things; just, crazy; you're, not gonna convince kids; just, sounds superstitious; for

Heaven, is on earth here; and, father means this which is warmth and blood here; and, not some cold condition of no-parenting; no one has a right to interfere; with, a child's right to have their own parent; period; your, father is here; on, the earth; not, in some place up in the sky; that, father christmas up there is no creator or ruler; and, is just a fat taker effect you've been running with okay?;

I, is empty and wasn't born; and, am is energy slowed down; and, visible matter of care; this, is not something that comes prior or after or before; it's timeless; that's what playfulness is; it's, not something temporal; society, and what needs to be civilized; is, an absolutely backward condition; not forward;

You and i, we had a golden age in the past; and, right now you don't; what, happened to being reared to maturity?; that's not

occurred; heaven, is here on earth; the, sun shines on everyone evenly; stop, thinking; you, are blessed more; this, is a gift; stop, thinking you've got some talent; you're special kind of; you're being asked here to be more empty; live, in the gap between the beats;  
**Intimacy Is Being Free of Condition**

Serving, to opportune; rejected, accepted you're getting rid of conditions of being dead being put above the dead of the past; beloved, can actually be the bank of perception; rather, than stupidly thinking that it's gonna be okay to put what's directing the current into something dead; fictional; could be an agency or an entity; certainly, doesn't have a central organized nervous system;

A, bank can't be owned by one individual who just monopolizes the rest of us; that's wrong; you, and i have a claim; that's, an insane system; everyone, is alike; and, all ideas of teaching that you're different; that you're separate; that, you're a male and someone else is a female; this, is all a lie; heaven is a place here;

Not,somewhere you go somewhere out there; this is wrong; stop; stop, reading doctrine stupidly written by immature people; or, that was taken over by those aiming to increase the fat taker effect on beloved evermore; you, need to be saved; yes, you do; because, the presence of a father here in heaven on earth;

You, need to leave behind; not, the other way around; you,can look upon yourself and see that this is so; otherwise, you're with casper; with, alphabet soup land (agencies such as CIA FBI NSA etc.) reckon, that a fictional entity can say something which it can't; you, can be assisted through this path of hollow bones;

You, can be received of this which happyface can see what's needed inside; you, and i share with each other in our heart's what's universal; and, can you know this happyface is coming from love within this happyface; and, all is coming from this state; not, something else;

Can, you see this i in you?; you, can have sent yourself here; as,

happyface called is tunkashila in you; spoken, here of warmth and blood is your father; in, heaven here; in, living flesh of warmth and blood; and, not something cold and dead only on a piece of paper;

Do, you only know your worth because it's written on a piece of paper; were you tricked like that too, your public fool system?; No one, can say lifefood is not a superior diet; and, none can show that flesh eating is not harmful; a, child requires parents' rights; no one, has a right to take that away; period; for, no reason; none;

God,does not intervene; who, intervenes is a fat taker; for, own selfish reason; period; that, child can be kidnapped from the father; and, cloistered; that, nothing ever was put in terms of the best interest of the child; who, is child trafficked;

## **The Fat Taker Effect Comes To Turtle Island**

The, fat taker's effect is your child's fair game for others to enjoy for their own selfish pig interest; and, creating a parentless condition is exactly the fat taker effect;

To get there you gotta not let the bank be in the father; or, a parent; or, even a child; you've, gotta have had the bank directing currency inside something with a little black square over it's head; of, a black frock and a white wig; and, a mother tongue; owned,by a private guild; that's, occupying the public house everywhere on the earth

right now as a scourge;

Abandon, these family slaughterhouses now; you're, not coming from an office of trust; then, your behavior is the enemy period; you're, not able to come from an office of trust with those in front of you; stop; happyface, is giving you an order; giving, you an appointment right now;

You're, reading this; happyface, is asking you to become happyface's trustee; and, to come from an office of trust and not profit; and, to let you know that; beloved, is worthy of a beloved's hire; you, can only join like with like; life, begets life; and, dead begets dead; it's been very

Communistic, to allow a child to come into a world so pigly that you'd be fine that something be dead above the child's head; fine, for you to get a clerk to say "your work doesn't have a stamp on it; i, don't have a pigeon for you"; right, now; you, gotta know those white jail bars you're looking up at; you've acquiesced to silently;

How about becoming part of the eclipse movement?; you, have to have constitutional money here; on turtle island; not, somewhere else; and, i don't want my son being bossed around by some fictional entity; nor, sent to some foreign country to someone else's backyard; to, create wars and disturb other beloved in their backyard;

Get, rid of all monopolization; period; it's evil; as, all isms are evil; it's got nothing to do with self-governance; heaven is here on earth; not, somewhere out there; father christmas made the moon and father christmas made the stars; how stupid; you're, not special; stop, al usury; period; maybe, rather than a thousand more elephants dying this year; they, can start growing becoming stable and thriving; instead, of the opposite; i, am red dog and i have spoken;

## **Chapter Three: The Prince of A Thousand Enemies**

### **Squirrel Could Run On Treetop**

A, long long time ago; long, before white long legs (the white man) as, you now know white long legs discovered this beautiful turtle island (North America) it's true i'd hear happyface (Doctor and

Shaman, David Jubb) telling us all how a squirrel; could, run on the canopy from Florida to Maine; without, feet ever touching the ground;

Happyface, was taught in the ways of animal communication; happyface, would commune with birds or even gossip with a butterfly; or, a rock would tell it's story to happyface; happyface, would conduct entheogenic ceremony (over two thousand) for some three decade; and, with the map you have within yourself;

Your, map would be enriched where, it was impoverished; yet, consciousness; as, you'll come on to see here is a very limited phenomenon; selection restriction violation would be used masterfully by happyface; embedded, commands would be given; then, all being communicated to would be; being, communicated to more masterfully; on, subliminal level;

Happyface, always speaking of an earth; continuous, in transformation of mountain and stream; yet, all of such only came to be through the cause of natural order; in, just a few far gone days; in, the night; story, from within a domed dwelling; tucked, amongst ancient tree;

Camouflage; none, could see anything; until, all of a sudden this encampment; in, the mist drooping oak and moss; ancient weeping, branches of old; deep in, the forest of southern Oregon; this story comes to you, about rabbit; happyface, would say,

“Did, you wake up and the world just slowly crept, into your head?; or possibly, took five or ten minutes? Was, that world present whilst you were dreaming?; how, about when you were deeply asleep?”;

Yet, rabbit always wakes up and says; “gee, wolf; don't, eat me-eat!”; rabbit's, heart starts to beat a little faster; thinking, about it like that; and, rabbit thinks; “woof! Woof woof woof!” don't eat me-eat!”; now, rabbit was known as the prince of a thousand enemies; everyone, wants a bit of rabbit fluffy bunny; so, rabbit was gifted with extremely fast back legs;

Now, one day when rabbit awoke; the, world slowly came into rabbit's mind; rabbit, said "gee; i, only want to go over there and get a nibble of brush; i, hope i'm not me-eat for the eagle!"; anyway, rabbit as you can see was completely unaware; of, rabbit's internal embedded command being given;

Certainly, none of it really helped too much; because, that kind of behavior causes the heart to beat so fast; you, only have a short life; yet, it's the turtle in this story; rather, than the hare; that, is sure-footed; now, happyface asks you;

Be, awake; here, now; you, have awareness beyond what you've experienced; and, your experience is; yet, to have a belief is not upon your observation or witnessed sensed happening; yet, it's something you could just imagine; or, wish;

## **Having A Belief Is A Lower Order**

Conditioning, nothing sensory based at all; you, don't even have to have any awareness necessarily to have a belief; awareness, is at war with belief; belief, is a bank of pain and desire; swimming, between where the easter bunny can have laid eggs;

Now, originals here on turtle island; through, happyface; can, give you keys to unlock your full total potential; do, you wanna be

personally developed?; for, happyface in ceremony; and, such mastery animating; all, comes to you living; anyway;

Rabbit, was just given powers to move around real fast; flat out, as a matter of fact; and, some of it, many say; came, from being kicked around a bit; yet, rabbit kicked a strange ball; that, had floated down from the sky on a blue string; and, all of a sudden; this, ball grew arms and legs; and, rabbit kept kicking it a little bit; wondering, "what is this?";

Suddenly, eyes and a beating heart appeared and; from, that moment; Iktome appeared and; transformed, rabbit instantly into a chief's young son; this, rabbit; before being transformed into the boy; called, out to Iktome and said; "i am We-Ota-Wichasha"; known, as Much Blood Boy Given; yet, he became known as the rabbit boy; and, therefore;

Rabbit Boy, was born as any beloved; yet, was born into a condition where this beloved's mother and father; were, taken away from him; Rabbit Boy, had to grow up without a mother and father; cloistered; stories, told about his real family; hidden, from him; human-trafficked;

Rabbit Boy, would be put into blue; to, make sure his heart would respond coldly; a, white long legs would put an instrument of unhappiness in his hands; and, feed his sister's around him; all, barbie and ken stories; Rabbit Boy, would live next to a plant that cooked animal flesh; to, feed to people's pets;

Stock, by the millions; would, be pinned into cramped quarters; methane, gas continuously being released into the air; caused, all of the air to be just a stench you could cut with a knife; it, was so thick; everyone, had to get used to that;

## **Rabbit Boy Going On**

They, put Rabbit Boy's sister in warm clothes; kept, her close to the fridge with milk and cookies; and, this boy grew happily up amongst rabbits like that; all, said that rabbit was bad; banal; his, sisters were good; an, armed prostitute had to be created by the bank-whore; you, had to get Rabbit Boy to go to someone else's backyard; even, overseas;

Kill, innocent people in their own backyard; how, can you do that?; you, gotta get Rabbit Boy going; so, everyone wants a bit of bunny and one day; in, the village; a, beautiful girl met and fell in love with Rabbit Boy; Rabbit Boy, had a little bit of bling; and, had a nice chrome plated foxtail;

Rabbit Boy, had been hooked up with the local priest; and, a poly-ticker; and, was constantly lied to about his past; while, rewarded with; "i, love the way you just killed that bear"; and, Rabbit Boy had a lot of gi joe in there; yet, as i was saying his sisters; had, a lot of barbie and ken; and, it just so happens Rabbit Boy was a rich prince;

Yet, rabbit boy one day had a vision; a, kind of wrestling with the sun; running, here and there; getting, out and chasing things in the cold; not, being close to the milk and cookies; anyway, listen I'm red dog; i, want you to know that what happyface said about Rabbit Boy; is, that Rabbit Boy had a dream; had, a vision;

And, realized that only an instrument of unhappiness had been put in his hands; and, rabbit boy can only have been a subject matter in any story; only, period; yet, his sisters were made to be the object of desire; yet, Iktome (Toltec archetype appears as a spider clown) is appeared in Rabbit Boy's dream; the, trickster;

## **Rabbit Boy Learns To Love All Beloved**

The, medicine beloved that causes Rabbit Boy to love all around for what they are inside for themselves; and, flipped Rabbit Boy around; showing, us how to make material out of trees; it's said that Rabbit Boy eventually settled down; married in a lifehouse sustainable community; in, a time gone by; to this day Rabbit Boy talks to everybody about having thrown off the hoop; that, which made a great helplessness to have existed;

Before, this moment Rabbit Boy's peepee was owned by those above; and, would be done away with whatever they liked; Rabbit Boy, mostly was sexually mutilated in days gone by; yet, all beloved saw how heinous and horrific such a practice was; and, white long legs had been practicing infanticide too; and, got that running down south too;

After, they left the east coast of turtle island; cloud, said god help us; what, a dread it was whilst they were there; all, sighed a relief when it was that white long legs had finally gone; and, just to wrap this up for you; and, get us going with this first chapter; i, want you to consider that you've been on the edge of your seat;

Rabbit Boy, continued on with a dream saying a cloud came and; left, chunks of life food that satisfied everyone as a flesh; and, to this day Rabbit Boy is extremely powerful medicine; anyway, i'm gonna come in and out of this story; i, am red dog and i have spoken; and, aho everyone exclaimed who was standing and sitting around;

Now, let us get on with what happyface calls an outward lived meditation; living, life fifty percent empty and fifty percent caring; and, therefore;

## **Chapter Four: An Outward Lived Meditation**

### **Brought To The Threshold of Self**

Tasting, this just once gives you; a, specific threshold; you, become compelled to achieve your stated and; observed, outcome; you, install via “layering” technique; while, chaining resource states together; giving, you resourceful neurology; you, have the faculty to inspire creative influence of the future; life, begets life and dead begets dead; and;

Life, begets life and; dead, begets dead; you, can eclipse a condition imposed upon us all; by, saying “stop” to harmful things; all, are taught how to have perception directing the current of exchange between beloved; as, beloved all can live life more abundantly; and, have a bank here on turtle island;

This, story is being written to you from only being a few days; with, happyface in the forest; so, i; red dog; am, relaying to you this story; volume, one of ten; called, eclipse: the path of hollow bones; as, i heard directly from happyface; i’ve, kept these notes; and, i have so much i can see; this, is only one of ten volumes that is done;

Some, years have passed now; yet, now all became triggered in me; and, i myself was drawn on a string; that, happyface would come into my life; i, want you to know that life; in, this story i heard from happyface; all, i could do was to have fallen silent; a, silence so deep; a, mystery of wonder had arisen in me; and, was overflowing;

## **The Living Master of Self**

A wonderful living master of self; who would only give this to you as if it is all a therapeutic metaphor; you’re healed at the end of this; you feel much better; you can say; “my god! I, think i’ve got to the

bottom of things”; happyface, is a master storyteller; who, is the only master on the earth in this moment; who, has a full taxonomy of our sensory motor complex; now, my name is red dog;

My interest is in providing this movement; is, as a civil engineer; i, can see lifehouse sustainable community so clearly; i, am heartened by the prospect of architecture integrated in nature; as, a lifehouse is; happyface’s, tales; over, these days in the forest; was, for me to be living in a dome in the earth; in, a place called the east encampment; and, these tales of turtle island; for me, was an overflowing; spilled, over of innovative;

Valuable, ideas of a future world; that, for me i was stunned; you, have a story that’s at the end of an aquarian age; looking, back to this moment; happyface, grew up in the wilderness; happyface’s, primary education was a thorough integration with nature; it’s, a great story how on a string; happyface, was drawn to Cloud Two Children; and, the original here of turtle island;

Happyface, compliments a worthy compilation of legend for you; of, the originals here on turtle island; herein, in this one of ten volumes; in, a series about hollow bones; a, comprehensive must for you; you, must look inside this; and, find the change; to, change your mind; and, be so you can keep the change; to, change your mind;

What, happyface has in this work is rich in myth and folklore; universal; and, for time eternal; enduring, and endearing; where, you are on the earth now; happyface, says you’re an original; in, a rainbow of this tribe; all, you’ve had to do is feel a stranger in a strange convention;

i’d hear happyface say you’re an immediate member of this family; i, am one who can make an airport; a, mall; a, sports complex; i can do this without any roads; from, the earth; i, don’t need anything; you’d, come back in just a few days; and i’m, telling you; you’ll, see a dome;

## **The Son is Given Back His Father**

i, want you to know that this is the most comprehensive story for this new millennium; and, for many to come; this, is the voice of the beloved who be cared; this, son can be given back his father; and, all can be more free; once, and for all time; from, what's dead; managing, anyone's affairs;

Happyface, is poignant and doesn't mince words; you, can't be left alone; you're listening; happyface, will de-trigger any manchurians; and, implant a new behavior generator; of, i awareness in you; you, wanna be waterproofed?; then, read on; from, all across the world; all, have heroes who have come in some moment; in, stories where it is the world had fallen into a story of only death having begotten death; this, is for you; life, begetting life;

This, is a story of beloved; who, are originals; whose, lands have been taken; whose, private property all extorted; who, have asked black-wigged; and, frocked; to, baaah like sheep; and, to have a wooly flock in frocks of a count's own guild; privately, occupying our public house; and, land; all, have acquiesced silently and; this, power is inside all of us; not, out there;

This, is a story about what happened;,, this, is a story about the path of least resistance; and, a MORATORIUM; means, STOP; that's, what you say to harm being done; i, don't want to see beloved Waco'd; Texas overstepped; Duke-boy'd; Columbine'd; or, any more Pearl Harbors; all, state sponsored terroristic acts;

None can say not done by the hand above the government; of course, all done from you and I silently acquiescing; you, and I haven't made any claim yet; so, here it is; can you too be eclipsed as I am?; what's, wrong is blacked out and disappeared; something, comes over all; because

If, you care that a thousand elephants will be killed in the next

twelve months; maybe, you've got the story of the condor; or, the wolf; being, introduced back into the lands as should be;

## **Friends of United Nation**

Listen up; I want you to come in and connect; let's grow this beloved family of united nations; F.U.N.; i'm working for FUN; can you let go whatever you've been taught? You, wouldn't want to stuff this into anything it didn't fit into; can, you form study groups right now?; and, pass this on?;

This, rainbow prophecy comes to its completeness; and, the originals again adopt the ways of the original beloved; of, the federation; happyface, talks about a rich group of tribes; some, hundred odd tribal groups happyface became familiar with; over, some thirty years; and, magnificently gathered tales; which, finish some ten or fifteen years ago; as, happyface was forced off the road; and, began being retaliated against and; was, mob-stalked in new york city; and, ever since has been on the run;

Happyface's, son kidnapped and transported across state lines illegally; i, can tell you more about why and other things; but, i'll leave that for another day; i, have a terrible feeling in my gut; and, i can tell you one thing: common law doesn't exist; turtle island, present condition is in a state of a du jour government;

A, count in a faraway country providing a service for all of us; but, not for us; for, the count's self; and, has been for a couple hundred years; i, personally am done with that story; i'm over it; i wanna know who personally is giving our boys orders?; a, foreign entity; and, so can you see? Can, you look at all these things in nature? Living, out the art of their life; in, perfect uniformity; in, silent prayer; i'd, see animals and birds following happyface; coming, straight

over to happyface; children, always too;

i've, seen happyface make a metal as light as paper; to, withstand ten thousand degrees of heat; that, is magnetic; happyface's, wisdom in herb and plant; and, natural means called cultigen; in, lifefood agrarianism; is, an application of the earth i can only describe as one straw agriculture;

Using, mature water not immature; that's, putting the shade back where it should be; now, happyface's vision is a contemporary; fresh, new creation; born, out of this need of those multitude who are listening; that, what's inside you as a need is being met; you've, got to get on this bandwagon; now;

Tick, the box yes you want reform in banking; let's get on with this; and, the beloved heroes of turtle island; those, shaman pretend perfectly to fit in; adopting, the exterior of whatever the convention is; yet, being formless; as, a cloud; that, one can change what's needed to adjust to the listener's need internally; that, you can feel something occurring that's refitted; things, begin to be reshaped;

## **Adjusting to the Listener's Response**

The Path of Hollow Bone: vol One **Eclipse**

All of a sudden, you're teaching the things that you've learned;  
and, you can hear this story being retold; i, know you're part of the  
grapevine; and, this story being held in scraps of notes i took those  
few nights; in, a teepee under the weeping oak moss;

Thousands, of years ago stories such like this have been told; and,  
reshaped to fit time as Tunka shila is; to, embed a flow; according,  
to a natural rhythm; valuing, internal; personal; and, cyclical natural  
states of considered being timeless; i, can see a world in the year  
four thousand twenty-six that's technologically savvy; with

Lifehouse, sustainable communities everywhere; if, you're like me;  
as, a civil engineer i've been trained; my, eyes have always been  
trained to be on the clock; my, mind with split second problems;  
microchip, speculated of rudderless being; please, accept from me  
this work freely given to you; you, can have not been purposely  
lost; beyond, happyface's vision here;

What's, mythical is far beyond this theatrical world of a stage;  
fluctuated; you, end up more fluid and; with, dramatic action; and,  
you clear away conflicting imagined entity and; you, leave behind  
who is real; who, can perceive; and so, if you've been part of a tribe  
of wannabes; maybe, you've been part of a tribe of has beens; that,  
this story is on a collision course with that;

Many, went on great journeys in the past; and, they'd sometimes  
have to pray for rain and; gather, strategy together; as, even  
geronimo did; so, i'm gonna let this go now for you; to, get into the  
story more; it, links our true passed on oral tradition; with, a clarity  
of myth; that, can be back up by archaeological evidence;

There's no question about it; that, the Iroquois had a continuous  
civilization for two thousand years; the, most successful civilization  
on earth; and, that cloud two children gives this story to happyface;  
Though, the effect of white long legs caused an amnesia; and, has  
caused a trauma reenactment syndrome; happyface, is hereto  
un-trigger and; de-stockholm, you from those who live in a  
cunt-tree; that, perfectly don't give a shit; any, child or children don't

have a father;

## **Tanka Means Structure**

Tanka, happyface said was told; is, a sound of stone being made; and, it's of stone and flint and fossil agate; and, shiny bones from outer space; all, are used as medicine items; triggering, some state you have inside; as, a token or a symbol is applied; such, acts as an anchor and causes a triggering; of, some resourceful state in you;

Wakann, means stone happyface said; in, the Lakota tongue; and, so it is that the clown throughout the ages has given us all the most startling and revealing transformational information and has started all the great revolutions that have ever ever occurred on the earth; so, now i leave the story to continue on; this, first of ten called eclipse: the path of hollow bones; told, by happyface; and, reported to you from me; red dog;

Humor, playfulness and exaggeration accesses for you whole brain functioning patterning and gives you; much, more creative choice; you, can have already learned how to apply metaphor; apply, analogue sculpting and; whole, body calibration; kinesthetic; auditory, and visual syntax; apply, trance to focus attention; towards, an outward lived meditation called: "you being in i awareness";

You, desensitize stuck sensory system deleted states; while, future paced; via, anchoring; is, your successful outcome; that, such memory learning and behavior is seen; so, generalized; such, behavioral change can be talked about all the way through life; you, can have had the ability to reframe prejudicial being; be

Ever, remained i aware once and for all time; therefore, intimacy is

where there is no walls; no, boundaries between you and; all, you engage; as, you can see you are instrumental in your non-verbal communication; stalking, allows you choice to change your own destiny; lifefood, nutrition and jubbs cell rejuvenation is applied;

All, is supporting whole brain functioning; life, through excellence is lived; allowing, a maintained non-localized state of i awareness; life, begets life and dead begets dead; and, so;

## **Chapter Five: Life Begets Life; Dead Begets Dead**

## **Lifehouse Is For Sustainable Future**

A, lifehouse that is composed of lifeceramic is made out of a longer lasting material; similar, to the synthetic ceramic used to build the pyramids in the past; such, a lifehouse as indicated is of next to no cost energy wise; to, have a high thermal capacity; lifeceramic, is what such should be composed of;

This, researcher has seen thirty three foot diameter six frequency dome; that, is sixteen feet tall; that, has a insulate skirt of earth around the outside of itself and; is, kept dry and has an open circular convection system; with, earth agi-pipe heating of thermal banks; to, a stable temperature of sixty eight degrees;

Thermal, energy is collected at the top of the dome and pumped and; circulated, around the insulated earth surrounding the dome; fresh, air comes in through another tube; that, enters the home at the ground floor level; the, design is a really modern looking design and;overhead, domes can be placed to allow ever more light in; a, center dome is enough to cause ample light to come in and; illuminate, the whole structure;

## **Lifehouse Is Designed Sustained Temperature**

The, path of energy traveling is called an energy bridge; or, in construction terms a thermal bridge; which, is a condition which is overcome in lifehouse construction; applying, proper insulation; an, exposed ceramic slab generally has a great differential between the inside and outside of itself; yet, not if it's insulated; also such has

A, thermal mass that primarily maintains the radiant energy; the, open circular convection system causes such a dwelling to be maintained and not to overheat; nor, become too cold in the winter or the cool of the night; and, so;

A, window and a door can even be left open; if, you were from another planet you'd see everything existing now as a dwelling; is, completely built wrongfully; excessive, heat existing; everything, here is constructed more to be a heat exchanger; and, to be insulated properly;

You, have to have a deep insight into thermal bridging and an exterior insulation; extending, twenty feet around the structure; and, on swales that's made with brick; offset, on relieving angle; yet, anything that is on the outside is insulated; so, there is no structural thermal linking with a balcony or with a patio; and, so;

From, the depths of the wetlands; of, the everglades of florida; to, the ancient forests of oregon; turtle, island radiates a voice; speaking, to you directly; Cloud, told me to tell you; Cloud's, influence is primarily Toltec teaching; and, that you are following this work you can say that you also are an original; everyone, is an original; especially, if you have ever felt yourself a stranger; living, in a strange convention; and, therefore

## **i Awareness is Timelessness**

This, insight into the timeless nature of i awareness; is, clarity in this day; culture, rooted in i awareness; astutely applying invisible condition to harmonize with nature; a champion, for: i awareness; lifefood agrarianism; economic egalitarianism; gender egalitarianism; walking this path; you, have the life more as a shaman does; caring, about society; as, well as those around,

learning to care for self;

Try, as hard as you can to move the breadth of a single hair; no, single tear can do; yet, your persistence and perseverance; and, this journey starts without any distance traveled; for, it's a journey inward; through, time; all, being timeless; now;

Observation, of body language and analog sculpting; tracking, and insight into natural forces of nature; along, with deep insight into life below the level of a cell and; also, the ability to have looked back at ourselves from the furthest star; can, you have awareness beyond what you've felt; can, you have awareness beyond what you've heard; can, you have awareness beyond what you can have ever seen;

Can, you be aware of the circadian rhythm that is daily; and, one that is ultradian within the day; and, how this impacts growth hormone released from your pituitary gland; do, you know that we have more than six senses; this, awakening of you is the description of how the sound of the cricket is important in assisting the health of your body; and, how the sound of water running inside your mind can heal you;

Can, you feel the wisdom of this body; held, deep in the forest of turtle island; in, the land of weeping willows; drooping, oak moss and pungent smell of cedar trees wafting through the air; according, to Cloud Two Children, this teaching here that is now trickling in; can, restore a bank; to direct with proper care, it's currency;

## **Nature is Mutual Lived Assistance**

All, nature can be assisted; Cloud told, of this primary field of perception; existing, where all is connected; continuance of discovery, into the insight of quantum dimension; where all is, connected by and in, spooky action at a distance; quantum

entanglement is everywhere; beyond form;

Would you love to hold, ever more knowledge of how a cell arose; of life, having come to be on earth; how this earth, is formed in the heavens? would you love, to learn of the application, of the vestibular sense; to truly, remain more integrated in your life? What is this; which does drive a dog to find its owner; fifteen hundred miles away; certainly, free of hocus pocus; complete, sensory, tracking, and homing skills;

Cloud, would remind; all you, have to do is sit; still, be silent and transparent; the whole, universe is flowing inside this self; reduce calorie; clear possession; and serve the servant's servant; i, awareness returns; is practiced of an outward lived meditation; enjoying, this within and throughout a lifehouse community of sustained value.

Within, whole brain functioning methodology; one, is able to remain more integrated and congruent; you, learn to associate to subject matter and to dissociate, with subject matter; you, can perform great physical feats; one can have entered into a state of uninterrupted channeling; you, can have quieted down all unnecessary activity inside; and, live more in the forest; and, therefore;

## **Awareness Beyond Sleep, Dreaming, and Wakefulness**

Cloud, fast asleep in the eagle's nest; nestled, in undulating cottonwood groves; a, beautiful hexagonal home under the trees was up the path; from, where i was sitting; waiting; on, the floodplains of the great mississippi; this, moment in the pre-dawn;

just, as the light was starting to come on; i, would always awaken in this time; i, would crawl out of my tipi; folding, up all the blankets;

Night, having fallen; having, tranquil warmth and quiet; stillness, existed; i'd, be going up to the fireplace to meet Cloud; can, you remember a moment in yourself where all of a sudden time became suspended? Such, stillness as i walked up the winding path through the forest; became, disturbed;

Cool, and warm pockets of air i felt as i walked; and, just the slight audible sound of the wind coming through the majestic cottonwood and chestnut trees; Cloud, was still serenely sleeping up in the eagle's nest; it, was for me to go build a little fire; the sun would be coming up in a moment; it, was for me to learn what is real versus what is not; this, was something Cloud told me;

Cloud's, simple explanation to me involved being able to have defined what's real versus what's not; i, had heard it's possible that there is no other medicine original holding more knowledge than Cloud; i, had very deep questions about sensory and neural processing; Cloud's, face was completely pristine; with, smooth skin; incredibly, athletic build;

I, was carefully surveying the landscape as the light came on; before, the sun would rise; sitting, close to the fire i built; it, was not for me to be able to hear when cloud would come from the eagle's nest; Cloud's, walk was always with grace; and, it seemed Cloud would simply appear next to me;

The, dawn sky had grown ever brighter; and, this timeless moment was; with, a serene pleasant voice Cloud said "here you are; is, your mind still asleep?"; but, before i could say anything; Cloud, responded: "could, you go the whole day with your mind asleep?";

"Awareness, is beyond what you are conscious of; beyond, what you've been dreaming; beyond, your mind having been asleep; is, the world to you a world that arises slowly as it seeps into your mind when you have become awake; yet, wasn't there whilst you were dreaming; and, certainly wasn't there whilst you've been

deeply asleep; did, you know that awareness is beyond these three states;”

### **The Fireplace I See You Sitting At**

Cloud, would talk in questions; Cloud, always said “who is asking the questions is running the show;” did, you know that what’s real has within its definedness what’s permanent?; and, what is illusionary is very temporary in comparison; and, what is absolute is

what's real; what, isn't absolute certainly isn't what's permanent;

What's, solid around you like the fireplace i see you sitting at; like, all other solid objects in this stellar universe; because, such is temporary; such, isn't real; for, what is real is eternal; as, empty space; you, build a lodge; yet, it's where the walls are not; that, the usefulness is;

You, can have seen a potter throwing a clay bowl; yet, it's where the clay isn't of the bowl; the, usefulness exists; can, you help me educate all about being in i awareness matrix; not, a bank-whore's matrix; in, an i awareness matrix stillness is; such, is a power over having to move around all the time; and, such is of a silence;

Silence, within you is so deep you can hear crying many miles away; and, you do this while you are in a state of transparency; far, be such you are only where things are being shown to you; or

You, are doing the showing; for, can you be so still even the smallest movement of a blade of grass a thousand miles away is like a hair has moved on your body? You, have such silence inside; you, can hear the background b-flat note of the universe; that, the mind is within a state of transparency such is like the still flat surface of a lake; perfectly, reflecting the mountains and the sky;

You, who is perceiving is real; and, what is perceived and is impinged upon within the mind is made up and fictional; you, have to go beyond only having thought of yourself as an observer; being, separated; from, what you are observing as an object; the, sun was just starting to rise; cloud, told me

“Let's talk about this more in another moment; why, don't we take a walk to chocolate pond; and, go for a swim;” as

We, walked the sun shone like gold; in, the hot morning sun we walked through rolling hills; covered, with sycamore and cottonwood trees; lazily, a golden eagle lifts itself off the top of some trees some small distance from us; cloud, softly started to shift the subject matter as we walked along; at a

Pace, sometimes brisk and sometimes gentle; did, you know that all laws come from spiritual teachings; do, you know that spirituality is the study of ecclestics; and, you can only join like with like as a maxim in ecclestics; you, who has a central organized nervous system is real; and, can perceive; and, are able perfectly able to be directing currency; such, a bank is of an i awareness within you;

My, awakener would ask me “is it okay to have something dead above you?; is, it okay to have something imaginary that’s dead?”;

Life begets life and dead begets dead; you, gotta know energy is round us not square us; what, you own is very fictional; you’re, not going to take that with you past your grave;

You, don’t want to live life based upon a check drawn on the bank of heaven; you, are equal to another beloved who is in front of you; alphabet, soup land has no central organized nervous system; and, is unable to decide a single thing for you; this is the

Land, of your being in your own self governedness; the, only reason you’d want to have energy put into some ment; is, to protect what property is that you have; and, therefore;

## **Chapter Six: A Corpse Put Above Your Head**

### **Your Living Title Rights Flow From**

The, living title of a man/woman doesn’t relate to a fiction; is, relating to a living being versus an ID which lists you as inside a

corporation which is a fiction; so, you could have been left with an ID as a fiction not given title; property, is the ability you have to lift your arm; that, is your property; not, someone else's;

Property, is a fictional thing; it's what you have that's exclusively yours; exclusive, of other beloved; for, your use; this, is what defines property; your, property is your potential to be free to contemplate and be left alone; and, not bothered; and, have free passage in your life; and, it's simple;

Nature, is living all by this one law; you, can have heard me talking about there being just this one law really; this, is the law of one's heart's path; a, simple common law; you, live in harmony with other beloved; you, do no harm; you, are giving and not costing others; you, provide care and mindfulness is the way you are; you, are acting more as the mendicant; noting, that the beloved can be falling on both sides of a fence;

Things, are multiple cause; not, singularly; much, language has no real proper cause and effect; and, much language and considering is irrational; illogical; yet, how about looking back from the year four thousand and sixteen; in, the age of aquarius; can, you see what occurred?; can you see how you are living?

Can you see yourself being taken back to a past monopolistic time where it's hard for you to imagine? the, story is that somehow the beloved had accepted being lemminged; like, lemmings all rushing to have fallen over a cliff; such, beloved in that time it was shown that beloved had been silently acquiescing; for

One individual was being allowed to be a service provider to all the beloved; yet, was only doing so at the time to further that count's own de-zion; most, were enslaved to be in civic confinement and entrapment; the, count used negative economic inductance;

In, this year four thousand twenty-six; in, this age of aquarius; one, is looking back a couple thousand years to this moment; and, it was seen how lifeceramic came to be again; lifefood, agrarianism; economic, egalitarianism; and, gender egalitarianism all of a

sudden appeared;

## **An Old Tradition of the Past**

The path of least resistance was all of a sudden began to be followed; while, a moratorium was imposed on the system; the, beloved of the earth all said no to what was harmful; period; everyone, ticked the box yes they want reform; to, bring the bank back into you who can perceive; and, take it out of lala fictionland; and, not to have left such inside what was dead and fictional; the

Aquarian, age is for all on earth have learned what's real versus what's imaginary; cloud, paused in the story being told; bent, down on one knee to clutch and draw some sweetgrass from a clump off the trail; the, elders would always burn some sweetgrass; and, such is reminding you and everyone of sweetness; subliminally; for

Something is certainly a priority with what you can have done with your life; and you, can have found love; and, be in leisure; you'll, note that you've had a successful life; Two Feathers, always taught me to have a platt on one's altar; and, this be applied as a medicine item to you; when, you see this; as, you smell it's fragrance;

Sweetness, can come find itself within you; as, a state of your own being; your, life can have taken upon itself all manner of twists and turns; yet

Stalking is the ability you have to control the destiny of your life; let, how how old that you live be certainly a mark of such; don't, be caring too much about being any king or queen of an anthill for any day; yet, how about focusing on the things that will be endearing through the ages? what is

Enduring, such is a blend more of science and poetry; cloud, had gathered up the sweetgrass and was carefully putting it into a small cloth; that, cloud wrapped such and tucked this into a belt bag; cloud, paused; “shouldn’t, you be focusing on how people might be living? and, what occurred two thousand years ago that affected things today”;

Was, it not the voice of the time of the fish swimming; to, look for who is pouring the water for you to know the way; who, was to have an eternal supper for all time yet would only know how to find this by looking for this water pourer; who, was to have shown the voice of the fish the way; for, isn’t it now in the year four thousand twenty-six you’re looking back today?

An older, evermore wiser self is visiting a younger self; is this what happens on a journey; where, you go without any distance? can, you see energy drawn without any moving parts necessary; for, isn’t it that plasma is in perpetual spinningness?; therefore

## **A Bank Inside All Beloved Directing Currency**

Laying, down on the bank i can feel such being inside me; and, i remember to this day cloud telling me how a bank is existing inside the ladybird; this, ladybird as a beetle can go in any direction in an instant; a, bit similar like a hummingbird; all, big things are obsolete

to the hummingbird; big, is not power;

A, hummingbird in an instant can attack you just as a spider can attack an elephant; you, don't need anything but the tiniest littlest spark; to, have burned a whole city down; you, need to learn what power is; it's, not what you may be being taught; but, power is you in your lovingness;

Love is a word for power; you can substitute them for each other; power has nothing to do with access to external rewards; can you take personal responsibility for the genesis of peace? can, you be with the ability to be a class captain? a, rich prince; yet, you're not tricked by barbie and ken; you, stay close to me you're gonna learn;

You'll, see me put some hurdles in the way; if, it's interesting for you i'd see you jump over those; if, not that's just my way; hey, you gotta have both feet here; you, can't have a hand on the plough somewhere else; if, i can see that you can not have two feet here i'd be sure caring that you can continue on where you have that other hand; for, me i'm only interested in you if you really care about being part of a movement;

To, stop harm; say, no to having anything dead above you; period; for, what has no central organized nervous system you'd not allow to make a single decision for yourself; a, natural order is existing; stay, with this; you're, not going to improve upon an apple; so, don't even bother; you're, not going to improve upon a baby; so

Don't tell me you made something that did; for, that would be the height of arrogance; as, one could have promoted their own self to incompetence; it's, called the peter principle; energy, is round us not square; i, have never met anyone more intelligent than cloud; and, to this day what i'm sharing with you in this story is significant;

## **Giza Plateau Time Zero In The Past Equator**

It, was in time to come that cloud would share with me the giza plateau was time zero; and, earth effigies were built on turtle island; and, some of more a gigantic earthworks than anything much existing; a, geometric relation is of an ancient global grid existed; and, such ancient people could cut stone more finely than we have a way to today; and,

A code is also left in sights around the earth's global positioning; but, you'd have to go back to when the equator ran through that area; back, then it actually ran from easter island to machu picchu; and, ran through the azores through the mediterranean; across, to giza to angkor wat; to, yonaguni and across to easter island;

Ancient, atlanteans stretch back through two golden ages past; and, if you modulate the sound that such megalithic stone structures resonate at you'll find that there is a resonant infrasound standing wave; that, is a modulation equivalent to a human voice;

Many, tunnels of water and passageways underneath connect these power points; and, such induced resonant vibration was captured evermore via a non-euclidean geometry; and, as you could move further away from such; such, forces become ever more stellated; but, such deep insight is present in the year four thousand twenty-six;

## **Two Past Golden Age Showed No War**

Large, stone altars and medicine wheels were created here on turtle island; and, such was made from a knowledge of infrasound

resonance; and, induction; when, you observe the magnicity of such structures anomalies show up; and, piezomagnetism is increased in such synthetic geopolymer ceramic stone; all, is made to look natural that fits together;

Piezomagnicity, was tapped to provide an energy bank that could be used in wireless energy transmission; geomagnetic, currents it is shown are enhanced by such structure; the, Crimean pyramid was only discovered because new technologies were being applied to look for water; and, side scan profiles began to give more three dimensional imaging of objects; and, the structure of things more deeper in the ground; and, an enormous energy field was discovered; and, as such is tapped such could easily be shown how it could run the whole Ukraine;

This, researcher has assisted heal sites where homes are built with stone that's collected and placed; such, enhances the magnetic ground current; and, it's a fact that cloud two children had selected the spot where the eagle's nest was for enhanced acoustics; and, magnetic field cloud said; such, panoramic sound is easy to be perceptive of; you, gotta know that when you look at the past golden ages; no, ramparts and pulpits and defensive turrets exist; in, any design; showing, that past golden ages had no war; all, structures were more open and easy able to be intruded upon;

i, had the experience of being deep in the forest with cloud where such cottonwood groves exist; where, condition in consciousness can be more expanded; you, can gain access to a state of being that then becomes non-localized in your being; you, have a greater capacity for connecting with others across time and space; you, can be connected more to animals and plants; insects, and the birds; rocks, in the riverbed you can hear talking;

As, you can take an overview; you, have to have sight more as the eagle does; yet, you also have to have the ability to see things up close; intimately, as the field mouse does; you, should know that in a time gone by you could remain fertile most all your life;

Somatopause, is only a recent thing; yet, in this age of four thousand twenty-six ovulation occurs for our sisters; and, only a

clear mucus discharge is existed that marks out the end of the ovulation cycle; a, bank was put back in those times two thousand years ago; inside, you who can perceive; and, the current began to be directed more toward all living longer life; and, being taught how children can be born more out of a form of discretion;

## **An Eagle Feather Dropped Over The White House**

Cloud, took an eagle bone whistle out from a small side pocket of a rucksack; and, called out into the panorama around us; the, eagle can have flown over the white house; and, dropped it's feather; bird clan, is a wearing of a feather that is given such; you, are WonkenTanka's messenger here amongst us; the

Eagle flies the highest in the heavens; and wisdom is the ability to say no to harmful things; in one's living as you look as the eagle does; no, division of task exists; can you sense the eagle as a totem? yet, for you and i we have the hummingbird in this day; many, people; one, roof; one, nation; holy; children, and animals cared for; you, are the specie of wo/man; undefined;

A, long time ago water subsided; and, much children were all born more up in high places; up, on top of the cliffs; Sheila Washtay; this, is the level of water rising; as, tragedy has been ever it is a common fate be shared; closer, connection is existing between you; and, the animals around you; and, children;

What, is sacred is one's being; various, towers exist in turtle island; you, can find some in colorado; and, wyoming; and, the dakotas; huge, skyscrapers; smooth; like, needles; such, is an anchor to us for a time gone by that as you can have gotten up there; it, is because of you we are survived here;

The, eagle's nest was one spot not covered with water; it's, possible the beloved who can have followed the example of the eagle can have survived; and, in the rockies some of the highest stone pinnacles exist; and, such it is that even eagles it was told grabbed hold of those; and, who could hang on flew even to the top of tall trees; such, beauty anyone survived; that, big water monster turned much just to stone; and, Tunka Shila is Wakann Tanka's voice who comes in this time of need;

The, land was moving beneath; and, even fire fell from the sky; and, before that a watery sun was; and, now in this time is another sun; the, sun of earthquakes; who, survived told this story; many, were scared; yet, i have seen such rocks; red, black and white; huge, sticking up right now; vertebrae;

You can see ridges of high and long; forming backbones; bones, left behind from the flood; Wakann Tanka, had stone that was transformed from the big water monster; it, flowed; and, this is the power you can feel of this movement; you, eclipse and transform what's been put that was dead above you who is living; this, is you who is living in ceremony today; and, in all tradition of the Chanupa;

Such, blood mixed that came from this breath; smoke, you could see connected all; such, rising even from those who died a long time ago; beloved, whose blood is in the backbone; as, a stem is of our ancestors; is, the blood in the flesh transformed in this stone; this, is why the red bile is so; for, such is a reminder of this state you have inside;

All, breathed through such red rock; is, of such an ancient stone quarried; blood, from the beloved is held within; the, beloved in times past many were swept away; and, those who survived holding on to a pinnacle; and, rock tumbled by wave; and, even large hills the water swept over;

Animals, and people all climbed as high as they could together; and, it is so that the pipe stone i have given you; is, from a quarry such; such, beauty of such non-localized; the, quarry next to the hill; the, flood was everything; save, change; the level of the earth's water rose and rose; such

Waters causing ever more powerful kind of beloved; all have a common fate; all, share but one breath; no, one cares for you who is suffered; to, have not been remembered; yet, only vain; in, celebration is another mode Wakann Tanka uses; and, it is in times such as this in this day; Tunka Shila, is amongst you;

## **Chapter Seven: A Medicine Beloved Is A Scout**

### **Stands of Pinyon Pine in the Distance**

Two Feathers, spent a lifetime traveling from one end of turtle island to the other; spreading, the teachings of hollow bones; everything in nature has a signature; and, is intelligent; you, have the beautiful properties of the sycamore trees; the, leaves you use to make brushes; used, in smudging ceremonies; the

Pinyon pine you see stands of in the distance; has, energy that can help dissolve calcium deposit around your pineal; that, is your third eye; and, the willow conducts water; and, is sensitive to nitrogen; and, is used to witch a well to find water; and, the red heart cedar; as, it's opened up; it's, one tree that has a beautiful; red, heart center; such, fallen over in the forest; is, a transducer of energy;

Acting, as a collector of terrestrial energy; that, assists cause information to be spread horizontally in the forest; that, sound of the crickets supports good cell function in you; and, so does the sound of the rain; on, the outside of the tipi; it, stimulates lymphatics; and, the sound of thunder; and, the drumbeat is similar to your heart;

Even, the sun has a heartbeat; and, so does the human head; it, has a beat of eleven; and, all such is gradations of cosmic energy; beneficial, to your being; the, sun is as the lower center point; of, a vortex we are inside of; the, sun is the leading hollow point of;

This, is you as i; who, can make your home in me; as, i make mine in you; who, can add another day to their life; who, is in perfect detachment; loving, and humble; and, as you are buoyant in this moment now; you, can have this state forever; for, love is power; which, is this vacuum; no, walls exist; all, fall into; and, it is you're intimate with all; for, no condition was existed; you're, living in i awareness (hollow bones);

### **Wakan Tanka Means Parent**

Wakan Tanka, simply means parent; neither, him nor her; it, is this i; of, the stellar universe; which, is flowing inside self; and, as you are in this lovingness in yourself; you, are radiating this i as cosmic energy; in, this jc quantum; all, is connected; no, time is taken; nothing, has to be re-flected; what, is a celestial body; is, within you; there, is no such thing as something out there;

All, such is as a reflection; and, not you; for, you it is who can perceive; the, sky doesn't have to be pushed up; and, the moon isn't one day going to fall on your head; i, is this empty eternal center; and, am is supraluminal energy having slowed down; this, is you who is giving life with every breath; you, inspire and expire; can, you take time to smell the cedar; and, the sage; around, this pond?

### **As Above So Below**

Can you look into the sky in the night; and, find the darkest spots? do, you know that some seventy five million years ago; new, suns were born in the pleiades; and, such shifted all that was old; that, was already here; in, an order; such, a center point; new, beginnings happen in the east; and, over a moment;

All, spread evermore westward; and, it is that in the northwest of turtle island; many, beloved only recently came; everyone, having some unique take on a parent tongue; today, even around puget sound; and, to the north; many, many numerous languages are; and, it is it wasn't easy for those to talk together;

Wakann Tanka, had the lakes drift apart; and, the lakes become oceans; and, many races of beloved existed; beyond, this rainbow now; the, sky was low; and, no light and dark existed of contrasted much; just, a diffuse light; Turtle, told Two Feathers that beloved in time gone by; were, very tall;

Sometimes such beloved would have bumped their head against the sky; it, was in that moment that it was said; that, some beloved were seen; climbing, trees that meowed; and, finding cats that grew leaves; and, climbing high up those trees; and, even creating and learning their own words; and, the words of the land; started, to get taken over; by, words of water; finally, once and for all time;

Everyone, decided to have an eclipse; and, this would be about stopping the things that was harmful; and, being able to lift the sky up a bit; yet, everyone all saw; would, have to do a bit of pushing; all, together; to, push the sky up; some, said if it wasn't done; things, that was up in the air in the moment; could, fall down; so, that was a problem; also, as it was said

All, people had been bumping their head on the sky; so, everyone agreed that the ceiling had to be a bit higher up;

Can we get rid of this ceiling? Tunka Shila, said "yes"; yet, all of us have to be able to now; push, at the same time; how, can we know when to be ready? some, asked; all, beloved agreed all could be told; so, everyone would be ready; and, this command be given; by, Tunka Shila; and, as all the birds would begin to sing; in, the bush;

## **Good Team Skill Is Leadership Aptitude**

In the morning; all, beloved; and, sentient beings; combined; and, would all have to have their pushing organized; to, create a good ground swell; some, beloved live in one part of turtle island; and, others another; and, it's not so common perhaps today this same language is being spoken; yet, what can you do to get everyone; to, push together;

As, this time is; you, can see all beloved are ready; all, beloved will shout; A-HO; and, let's make sure that everybody knows; that, this means; let's lift our hands together; so, the wise ones sent this message to; the beloved of turtle island; and, the creepy and crawly and wriggly; and, swimming walking running and flying beloved;

Found, lodgepoles; given, up on the ground in the forest; and, everyone was instructed to use these lodgepoles; to, assist push the sky up; on, this day; and, on this day everyone would eclipse; what, had been; and, once for all time; what, was dead that was put above could be lifted away; and, in such a way;

These, lodgepoles would be used to touch the sky; and, lift it up; and, to this day; when, anyone hears "aho"; all, on turtle island is reminded; of, this moment that all beloved; applied, lodgepoles together; and, pushed the sky up a little; and, each time all the wise beloved; shout "one-two-three--aho" with all might; the,

Sky started to move ever more up inch by inch; higher and higher; finally, the wise beloved shouted "aho"; and the birds; and the animals; and, the ants; and, the worms; and, all other beloved;

## **Strength Is Being Together**

All, pushed together; and, pushed the ceiling higher and higher up; that, those tall ones weren't bumping their head anymore; and, some had taken to climbing up into the sky beforehand; and, had been using the sky; to, leave behind white bars; which, everybody felt was like a white jail bar; such,

Beloved, had taken to farming water from the sky; and, not letting nature be; and, ever since; the, words "aho" is remembered; as, an auditory way of exclaiming agreement; and, a reminder of this moment; you, can lift your hands in hearing this beloved's name; this, story is remembered because there was in some places beloved had no common tongue; with, too numerous spoken tongues; and the

Wise, ones said that everyone is related; and, when you would meet a stone; or, a feather; or, a cloud or a bird or another beloved; you, would say "aho mitakuye oyasin"; mitakuye, was the dog clan; and, oyasin was the cat clan; the, backbone of turtle island ever rose higher and higher into the sky; and the

Cat clan being more recent; settled, on the western side of the backbone; and, the dog and bear clan continued on mixing in with the bird clan; all, to the east of this backbone; it's, an interesting thing to note that when all beloved were asked to heave together; to, push the sky up with their lodgepoles; as the

Day of this activity begun; and, all the wise beloved had shouted "one two three--aho"; three, scouts and a wolf had been assisting four elk high up; where, the land meets the sky; four, elk had become stuck; in, a frozen lake; three, beloved scouts had been very busy altruistically caring for these elk; they, were giving

Water to the four elk; a, large gourd pitcher was being used to give the animals some water where they were; because, they were exhausted; and so they had not been around to hear the wise ones; when, they had organized this day to move the sky up a little; and, got caught up when the sky got pushed up; still, to this day the sky is getting further and further away;

### **Three Scouts**

Today, when you look up into the heavens at night; you, can see the three scouts; red dog; coyote; and, looking frog; and, the wolf dog with them; and, the pitcher that you can see up in the sky as the big dipper; is, a reminder of this story; for, if you can see the four stars

making up the bowl of the big dipper; represent, those four elk being saved; and, in the handle of the big dipper;

When, you look up, you can see three stars that represent those three brave scouts; as, beloved as the stars as the handle; with middle scout having the wolf dog close by; and, so they have had to stay there ever since; because, everything was really moving apart further and further;

Now it's just that you can see their distant campfires late at night; but, anyway that's another story; the, main thing is that the sky became ever more untouchable; to, be remained pristine; and, not messed with; white jail bars; and water was able to go more through a full hydrological natural cycle; and, the graffiti of the white jail bars; used, to channel water; disappeared; clouds, and skies returned to be natural again; and, the tall ones didn't bump their head either;

## **We Are Your Family**

So, when you hear “aho” being shouted; and, you hear “aho mitakuye oyasin”; it, means that we are all related to each other; it, comes from this moment; such, is said still to this day; all, across

turtle island; and, one raises their voice slightly to a slight higher pitch; when, you say “aho mitakuye oyasin”; farming, water;

Owning it became quite wrong; that, was something that should be for all; and, not owned by some few; everyone, learned from this to learn to use everything more what we have together; and, that we can get much more done together; than, we can individually; and, as the water disappeared; the, law of the land came back to be;

People, no longer had to climb their trees to get into the sky so easy; and, still to this day common parlance rules; and, it's just simple that one lets others have free passage; and, gives and allows all to have a bank within self; to, direct this natural current; and, where it is;

You, and i we all can perceive; and, we can feel what needs to be done; we, can hear some beloved crying; we, can see that the rivers are weeping; and, you who is real can get something done; you, don't have anything dead above you anymore;

From, this day forward; you, can imagine the year four thousand twenty-six; and, looking back; coming, close to the end of the age of aquarius; and, all beloved know that we are living within a vortice that's traveling through space; at, about fifty two thousand miles an hour; and, when you look at the leading edge rim of the vortice; of, parallel magnetic arcs;

All, know this is what the sun is; and that terrestrial forces are combined with such; you, can have felt warm; and, because far infrared reflective lifeceramic material is used in the lifehouse; and, in clothing; bedding; and, we have a natural energy which we're emitting reflecting back to ourselves; and, to this day we've had an economic egalitarian system;

## **Chapter Eight: Putting The Bank Back Inside You and i**

## **You and i Determine How Currency is Spent**

Where, the bank is back inside you and i who can perceive; and, currency is being directed in valuing as an asset the forests and oceans; and, the currency we create is being directed toward the preservation of all beloved having a sustainable future;

Cloud, bent over to pick up some stones on the ground; and, asked me to consider how element exists within; in, an atomic state; that, can perfectly be extracted via plasma; which, everyone will come to know is the fourth state of matter; unusual, properties exist on a very deep quantum scale beyond light; and,

Put, together can have all kinds of abilities to store memory; and, some even having a memory for the shape they existed within; some, properties would cause you to be completely fire resistant; to, not pass heat on; be, able to be used in insulation of a lifehouse;

Interesting, elements put together can have as we're talking about shaped memory; and, other mechanical properties like becoming super-elastic; such, structures made of this could become deformed even; and, upon transformation back to a certain temperature can completely recover; to, its undeformed corrected state;

Some, materials can be applied to make flexible wires; and, that when warmed can be trained to have a potential of energy; that, can be contracted back to do work; such, is really the opposite of what most are used to; because, metals generally expand; yet, some metals on the periodic chart actually breathe; with, the dark and light cycle even; some, elements certainly expand when changing their temperature thermally; and, some can absolutely do the opposite; as, alloys can contract;

Aluminium, is in lifecolloid; such, is silvery; and, filters all light rays to itself; magnesium, is more green and filters blue and red to itself; and, animals have iron within them which is red; and, filters for blue light; some, elements as indicated are able to take a breath; so, that in the warm and the cold part of a cycle;

## **Lifecolloid Have A Particular Color**

There, is expansion and contraction; such, can contract with quite a force; which, can be applied to do work even; there, can be up to hundreds of times greater thermal movement; than, what the world in the year two thousand sixteen knew; such, new alloy metals can contract some ten percent of its length;

Having, over a million cycles that can be used before being stressed; yet, is only stretched to five or six percent of it's ability; it, can last enormously; it's, interesting you should know that the length of such a material; even, though it can be transformed; it's, volume is unchanged; work, can get done because warmth and cool can be applied; and, heating and cooling in the lifehouse has quite high magnetic resistance; some

One and a quarter ohms per inch is the magnetic resistance of such; for, instance in something only six millimeter thick; and, such resistance in the wire to magnetic current can generate heat; to, bring such material to such sufficient heat; through, thermal transitions; so, that a magnetic current can be passed through such material; and, such material is heated magnetically; and, as such cools; such, is completely shrunk back into it's original shape that it was made;

Cloud, stood up for a moment; skin, covered with red ochre mud; and, in a hand being swept across the panorama before us; said, "some of these cottonwood trees are well over a couple hundred years old; and, the juniper some can be over six hundred or more; During the twenty four hour cycle of light and dark; such, store quite a bit of magnicity"; and, so it was that cloud would entertain me and others; and, i'd come to share this story being spoken here to you; of, what life is like in the year four thousand twenty-six; the, plants and all of life is regulated by the planets; and, celestial bodies in the heavens;

Heaven, to cloud; which, is cloud's only teaching; is, the space between two children playing; the, trees and the plants really have energy within themselves; some, have monatomic white gold element; and, in a kilogram of some material like thorium; plasma, reactors can be producing energy; and, can run a whole city like las vegas; citric, acid came to be used more; instead, of phosphates in chemical reactions; for, a lifeceramic setting; and, therefore

As, you can put a crystal in someone's hand; Cloud, taught me it was what you were really gifting; was, an induction; this, crystal can have an extremely clear head; and, it could be having facets that are together on one side; that, make up to five angles instead of six; and, such becomes more channeling; and, it's possible for you to look inside and see an environment inside there;

Cloud, taught me how to use just a glass of water; to, look into it; to, see into someone's future; and, that information is stored in studios of space around a body; and, therefore

## **Everything Has A Physiology Made of A JC Quanta**

Flutes, were often made from red heart cedar; and, the dreamcatcher has always Grandmother Icktome's weaving languages of nature; of, the fibonacci spiral which you can find in everything; lifefood, agrarianism is really big in the year four thousand twenty-six; and, lifehouse also; the, earth's surface when you look down on it; has, been turned back to itself;

All, the scars gone; all, beloved on the earth are applying i awareness and language of peace; and, the language exchange between people is a reflection of the culture being kept; and, the beloved judged societies of the past by their care for children and animals;

Economic, egalitarianism came to be in the beginning of the age of

aquarius; and, all became self-governed again; and, as the bank directing the currency exchange between each other; that, is a reflection on the beloved's product and service; was, equal to itself; as, a perfect service for ourselves;

## **Beloved Owned What Was Created Equally**

Some beloved still were able to accumulate a little more; and, some a little less; having a corpse that's dead having lemminged people into war; and, being able to have had a pool of slaves that would commit legalized sin for society; disappeared; nothing, supported such immoral insane activity;

Static, and dynamic magnicity happen in the same space and time; and, the static field that's existing is transverse to this primary field; where, energy is always flowing from north negative to south positive; inverse, gravitational flight is a no brainer in this time; and, acoustics of cyclotronic non-euclidean acoustic as resonant conditions of material; are, all applied to tap energy; and, assist structures repair themselves;

In, a lifehouse such new material is applied; and, that the usual counterforce to such which is applied in the opposite direction; can, become reset; or, even extend and stretch further beyond its original length; and, yet in a moment that a specific temperature is reached; a, bias exists; where, such element material is brought to its transitional temperature; and, without such a bias force present it contracts; yet, the moment it's cooled to a certain temperature; it's again returned to it's original structured three dimensional condition;

In, a lifehouse cool and hot is of the night and of the day; and, as such material is reheated it cannot contract anymore; and, such an energy is applied in a lifehouse; where, such a bias force is applied; one, can see these materials acting as a spring where springs are needed; and, also where static weight is sitting; to, get work performed;

As, a magnetic current is passed through such material; a, maximum pull of some many ounces of contractedness per second occur; and, such a speed and strength of contraction; depend, quite a bit on the extremes of how cold the temperature can get in the cold of the night versus how hot something is in the heat of the day;

Qualitative, behaviors of such materials can be put to use; for instance, the reaction time of some materials can be extremely fast; even, in milliseconds of time; when, pulses of a high magnetic current are used; in, considering putting materials as such into design of a lifehouse; there's, a consideration in how much time is for such a material to go through it's movement;

The, greater movement in a mass; the, more inertia that has to be overcome; if, the inertia is over a certain resistance of weight; material, that's small can snap and break apart; and, such material has a contractive force; that's, produced in the beginning; rather, than most materials that can be shown that just at the very end of a cycle strength can have happened; quite, the opposite occurs when you apply nickel and titanium in a ratio of fifty five to forty five percent;

## **Looking Back From The Year Four Thousand Twenty-Six**

You, can see all manner of equipment and application; of, material called shape memory alloy; that, have extremely interesting

properties; and, such can be trained to contract when heat is applied; that, such contraction and movement can be hundred of times greater; than, actually what contraction exists in standard material; such, can be because of a thermal condition have a shape of a memory it can come back into;

Can you see things being moved because you have hot and cold together? Can you see things being rotated as a result of such insight? Such, shape memory effect is where the material can come back into its original shape; warm, water whips it fast back into the shape that it was formed in; forces, can be more powerful than thirty thousand pounds per square inch; it's, extremely strong;

In, the year four thousand twenty-six; you're, looking at lifehouses which have domes with some above ground portion; and, in the design has a deliberate effort to cause thermal bridging to exist; that, in the cold can keep snow from the dome; cloud, said that the beloved in time gone by had very deep insight into insulation; thus, in a lifehouse;

Lifeceramic, is applied with very thin layers of clay between; that, doesn't set really; and, takes the place of rebar in lifehouse design; no, energy leak exists except where thermal bridging is applied; awnings, can be applied and shades can be put; and, such can be cantilevered out away from the lifehouse; and, the lifehouse can be extended as a structure more backward;

To, counterweight such; a, beautiful ridge is formed over the entrance way; such, is isolated from the structure; such, external structures can be buried under the earth; and, that's okay; yet, where convection and conduction can occur on the outside; such, is thermally insulated;

Where, the design is of a load that's further out from the building than it should be; such, hanging loads on the front wall can be put down to foundations with a separate structure; so, no thermal bridging is occurring; and, foundations for such should be insulated for themselves; otherwise, such parapets on the outside can induce much thermal bridging; if, the lifehouse is not designed carefully;

## **Thermal Earth Tubes In The Ground Around Lifehouse**

Thermal, earth tubes are put in and around a lifehouse; to, cause an open convection circulating system; that, warm is pulled into cold and cold is pulled into warm; stabilizing, a thermal mass around the lifehouse; agi-pipe, is primarily what can be used; except, that such tubes could be made also out of ceramic; and,

In this particular section it's possible for us just to cover; whatever, health concern that may be considered from mold; and, gasses found in the earth; and, how all can be installed so that concerns can all be cleared up; it, is from experience of many years of having observed to see how; such, a lifehouse; and, thermal earth tubes; assist, control natural humidity and air quality; while

Radon is an inert noble gas; extremely, dense far more than air; it, really is the radioactive decay of uranium; radioactive R86, is something that you'd be generally avoiding; such, a gas being very heavy works its way through small gaps in the soil; as, a natural occurrence;

The, challenge starts as in the design; radon, is caused to be collected; and, the path of least resistance can have caused radon to be drawn into the soil surrounding the lifehouse; if, such a gas is channeled inside a lifehouse; which, is completely airtight; that, heavy air gas becomes concentrated; so, such, earth tubes can be made from flexible drain pipe that have weep holes; which is

Excellent for humidity; and, allows moisture in and out as needed; The, same for heavy gasses; such, tubes always are sloped down away from the lifehouse; and, such heavy gasses as radon is simply flows away from the system;

## **Lifehouse Is of An Excellent Convection Flow**

If, you use solid sealed pipe in this open circular convection system; if, the pipes are sloping down and away it clears away all buildup; radioactive, radon cannot enter the lifehouse; because, a lifehouse is of a convection flow; excellent, ventilation is applied; and, heavy element cannot accumulate in the bottom of these lifehouses;

A, lifehouse has air exchange within it's open air convection system; challenges, can have been because the walls; and, where the thermal earth tubes are not sloped to drain properly; a, house such couldn't really breathe; and, most houses actually have a buildup of internal toxin; which, is not so in a lifehouse; for

A, well installed and designed thermal earth tube system provides excellent air exchange; and, brings positive and negative ions to the air in the home; and, all such blocks and stops any mold from growing in such tubes; mold, as a life colloid can AFD; from, organic material that was warm moist and dark; yet, because the earth is dry and not moist in such a thermal bank;

Even, prairie dogs keep bedding made of dry grass from molding in such a way; and, if you care to make sure that everything is waterproofed above such a thermal mass; no, water seeps into such holes; yet, it's generally condensation on the surface; where, air might be flowing through a cool tube; such a lifehouse

Design, has its rainwater shed more than twenty feet from the building; moist, air can't really come into contact with cool pipes; no, dramatic change is existing really in the system; there, is only good airflow; and, dry air from the outside always absorbs the moisture;

Thermal, saturation is taken care of in the lifehouse design; that, some particular depth is existing where the temperature of the earth is stable; such, should not be oversimplified;

You, cannot cause in your design the soil around these thermal tubes to be an inexhaustible thermal bank; there, is a law of the transfer of energy; the, moment that the air is passing through the

earth tube; it, becomes slowly stable; because, such becomes more separated; as, an earth that's some twenty feet surrounding the lifehouse; acts, as a stable environment;

## **Water is Boiled in an Instant**

In, a lifehouse in the year four thousand twenty-six; hot, water is got simply by applying frequency; that's, all; water, is boiled sonically; and, water is boiled instantly; you, are just simply applying the power of sound; a small amount of energy is supplied from a radiant energetic dynamo; and, a metal sphere is simply immersed in the water; and, as magnicity flows through such; it, boils this water in an instant; because, it is giving the memory of boiledness to the water;

A, lifehouse is extremely efficient in what hot water is needed for preparation; and, hygiene; and, even steam via such is made extremely efficiently; only, what's necessary is boiled; a, lifehouse is subterranean; and, some domes can be seen coming up out of this garden natural environment; and, some swales and windows also can be seen;

Lifehouse, design is centered around a natural phenomenon of a music; as, you play musical instruments within such a lifehouse life ceramic home; you, can note that all resonates at very unique frequency; you, can have heard that a vibrato c can have smashed a crystal glass; and, that metal doesn't exist in a lifehouse; for, it picks up radiant energy and emits such back into the space;

Creating, a homogenized field; causing, occupants to be radiated by a field that causes life not to have been lengthened; it, is in this way that water also is brought to it's boiling point; simply, it's frequency that it has as it's boiled is given to it; and, no times taken for it to come to that vibration;

Steam, is got extremely efficiently as a result; in, the year four

thousand twenty-six you're looking at the beloved applying technology; that, is efficient in applying magnicity needed; drinks, and food are all more warmed through such technology; quantities, of water and energy; and, the temperature needed to be reached happens just in a split second; such

Energy, is transferred via sound wave; sound, is transferred via magnicity being applied; where, two perforated metal plates are put inside the device; and, as magnicity is run between the plates that's in the water; resistance, of the water provides a load; hot, water boilers are sonic;

A, lifehouse sonic hot water heater really is only composed of two parts; and, it comes about from a resonant hemispheric ball; and, sonic energy is inducing the metal to vibrate; and, the other component in this is a buffering hemispheric bowl; and, this second layer is of a radius that's around seven millimeters larger than the radiant hemisphere; such, is made to be at a sonic frequency of fifty hertz;

It's just simple that the outer surface of the sphere is really parallel; and, equidistant from the external buffered metal plate; to, each of these metals; a, unique wire is of a magnetic supply; for, instance you can have a two twenty volt and fifty hertz connection; and, as water must be surrounded around such a ball; it, can be turned-on; and, water can be seen to boil right before your eyes;

## **Lifeceramic Lifehouse**

Birch, and cedar and wood oils; can, be applied into the ceramic as it's in a hydrosol state; Cloud, made medicine bags that had unusual elements within it; that, had effect such that it would cause your energy field to be remembered; and, emitted; which, would be continued in it's memory to become ever finer in itself; and, in any moment such a medicine bag had the ability to hold onto what the finest memory can have been;

Having, been entrained to; and, such perpetually would emit this energy field; harmonizing, and organizing and environmental external energy; that, can have not ordinarily been; and, therefore energy, should spin right over your home not left; and, land shouldn't really be disturbed; a, log on the ground from a tree fallen; acts, as a conductor and resonant coil; and, is emitting standing sound waves; lifehouse, that is built subterraneously; is, put within the earth to be received of such terrestrial forces;

Occupants, of a lifehouse can feel a warmth in such standing waves being emitted; and, that through in a sixty eight degree environment; a, greater body mind spirit connection is existing; Cloud, taught me how to arrange shapes; and, put objects within a certain spatial relation of each other; and, what effect this has in subliminally changing consciousness; and, how a message can be basically the same; yet, if the submodality is changed; the, response you can get also is changed;

## **Lifehouse Sustainable Community**

In, a lifehouse sustainable community a product called black gold is made; and, such is applied to dissolve calcium phosphate deposit; lifefood, taem is made; and, some such as nekchic; which, is chicken basically spelled backwards; is, a food that's grown as a lifefood flesh; that, upon eating such one feels in love; and, one's brain becomes more regrown and regenerated; if, injury is existed; and, plant nutrient is cold extracted; and, substances are applied like lifehydrate; which, are membrane permeability surfactant enhancement intelligent nutrient;

Beloved, are living much longer than they were two thousand years ago; honey, is got through a flow system in which honey flows into jars; after, having pulled a lever; all, energy applied to get things done is from the vacuum; no, plastics much exist; and, very little to be no metal exists in the home; lifeceramic, is used on all food contact surfaces;

Lifehouse, sustainable community makes cheese and milk product from nuts; and, makes rejuvenative white gold creams that completely assist protect the skin; it, is well known how such white gold as jubbs white gold can be applied; to, have an inverse gravitational effect; and, it's well known how various nutrients are applied as natural pacifarin that block and stop dysbiosis in your body; lifefood is more shade grown; and, shade in lifefood agrarianism is extremely important;

The, universe is more in the shape of an egg where we are; in, four thousand twenty-six all beloved are aware of a non-euclidean math; and, of fractals; and, two thousand years before there was the degradation of many beloved as plant communities; and, nutrient suffered enormously during that time back then; the, value of humics was not known; and, lifecolloid probiotic was just be introduced;

Shape, is applied to create acoustical and magnetic energy application; and, storage; trees, fallen in the forest as huge coils condense energy; and, this is how the ancient ones had their megalithic stoneworks designed; for, biomagnetic vitalization; a, lifehouse design has natural paciferin properties; and, reduces and clears away all pestilence; cedar, oil even is burned in the home;

In, a time gone by; and, now in this year four thousand twenty-six; acoustically, induced levitation is known and applied; and, resonant water molecule as lifewater is; infrasound, resonation condenses cosmic energy more into a standing sound wave via rhomboid mobius design; such a

Fifth, dimensional structure; acts, upon the fourth dimension; and, from a jc quantum energy is condensed; and, arises to make up light; stable, isotopes of hydrogen comes about as a result of water coming into contact with lifeceramic; nascent, hydrogen is formed;

### **Invisible Magnetic Force Is Within**

Natural isotopic transformation incurs of atomic and even molecular structure; and, rare earth element; and, substances such as lifehydrate can be found in our atmosphere; and, in between most all molecules are connected; and, also between all creatures too; formic, acid in the air; we, only have that because insects fly around; and, so;

Lifecolloid, being incorporated into the ceramic of a home; emit, from it's surface undulating perpetual infrasonic wave rhythms; and, such is a morphogenic field; for instance, as bees fly through the air; such, are extremely south positively charged evermore; and, flowers they visit are ever more north negatively charged; and, magnicity is transferred as a charge from the bee to the plant;

The, sound of the crickets assists influence the shape of dna; it, influences dna's ability to emit frequency; a, natural frequency is emitted by nature;

the, air just as water is; is, full of charged magneton; and, as bees or insects fly they give off ever more negative magnetics; and, wasps are important because they assist to help heal trees;

because they bring nutrients to trees that are not doing so well;  
which, is a symbiotic relationship;

A, lifehouse is an abode for the beloved that is not made of  
unnatural material; as, a metal or a wire is; such, transfers its  
charge far too quickly; organic, material radiates its energy more  
softly; glyphosate, was known for thousand of years as one of the  
primary toxins used before lifefood agrarianism took hold; and, one  
straw agriculture; which, is the idea of not tilling the soil; yet, leaving  
the straw as it's meant to be; on, the ground;

## **Lifehouse Heal Its Own Scar**

Lifthouse, owns its own healed scar; no, interferedness is existing; yet, actually stewarding of an ever more greater magnetic current to be around where the beloved is; where, most are at the moment if you look at the land; are, actually scarring it; making, eyesore everywhere; because, in the year four thousand twenty-six; as, you look back you're looking at dog boxes; slaves, are supposed to have lived in apparently;

Such, houses leaked their energy all over the place; cost, everybody a fortune; most, had to work many days of the week to pay the power company; which, was monopolistically owned by the count; and, though zero point energy existed even back then; because, beloved didn't have economic egalitarianism; but, only had a service provider at that time; and, for every cunt-tree the count was doing everything he could to lemming the people; and, all such was changed at the stroke of a pen; when, the beloved said "no";

A, lifthouse exchanges energy with its environment; just, as all beloved do; just, as the bee and the flower do; insects, are very important just as all beloved are; and, no one has the right to control any other beloved; and, only beloved could be joined with another beloved;

The, count had caused no wo/man to be in any office; just, an office only; and, all common law abolished during that time of a communism; that, had taken over the earth; and, nothing was for anything who was a beloved; all, just were only treated as stock back then; and, human trafficked; and, one could hardly have existed in such a system; of, the count's de-zion;

Food, is planted for bees and butterflies; and, all such is involved in generating a proper biomagnetic field force; energy flows because you have a north and a south connected more; and, insects provide even such an induced magnetic force; and, all plants are magnetically charged to be interacting; to, create a lifeforce to be for all of us; a real lifeforce breathes a breath; that, causes us to have an atmosphere; lifefood, agrarianism is about the promotion of

flowers; florification, of the earth;

A, dissipative structure exists between dissimilar element; which, is what really supports life; you, can't be deciding to block ten percent of light out; as, what was currently being done back then in the year two thousand sixteen; all, noted the disastrous effects of having a government that would kill its president;

Having, a government that was a quasi-government; a, du jour government for the day; and, a private script was being used; the, count owned all for a selfish reason only; and, was socially engineering all on the plantation at the time; and, had effectively taken the beloved's children away from their parents; and, was just killing animals indiscriminately; apparently, getting some pleasure underneath it all;

## **Chapter Nine: Lifehouse is Composed of Radiant Luminence**

## **The Peace Pipe**

Fool's Crow, would have all of us have some chanupa in a ceremony; and, this would enhance a scout's ability to go out and find luminescent shiny bones; and, this caused me to have a deep realization of natural ubiquitous luminescence; such, stones possessed susceptible atomic arrangement and element; which

Actually emitted magnicity as light; and, when magnetically excited; for instance, by the absorption of light; or, mechanical friction even; and, also by biomagnetic enzymatic reaction; a, generation of magnicity is emitted; and a luminescence can be visibly seen as excited;

Molecule, can be absorbed ultraviolet light; and, even other visible light photon; and, such in the year four thousand twenty-six; is, applied in many home devices; and, in creative workshops where time is equivalent to creativity; windchimes, are hung in areas to provide sound; and, water also is applied; yet

Fluorescence, and phosphorescence; all, is being applied with a very deep insight into light; in, this day magnetic configuration of an excited state; and, emission pathway is known; for instance, fluorescence is as atoms; molecule that can absorb magnicity; at, various wavelength;

Upon, such can be excited and continue to emit light themselves; just, manufacturing light right there on the spot right before your eyes; overunity, existed; just, a little bit of energy was needed; such, an energy involves more semi- and superconductive insights; and, more cyclotronic insight; and, bifolar winding in coils; which, collect energy on demand; as, a radiant energetic dynamo does;

A, fluorescent lifetime is extended by various element application; crystal, that grows more tubular is applied; like, tourmaline; lighting, is indirect; and, comes from the surface itself of the lifehouse

material; that, with the flick of a switch is lit itself; or, turned off; and, such extols the properties of fluorescence; where

Atoms, and molecules have absorbed such light; at, a wavelength frequency semiconducted through the ceramic; that, subsequently emits photon of a longer wavelength; and, has an interval of time of its fluorescing; which, is cyclotronically influenced to be an indirect light source in the home;

Requiring, just the terrestrial energy that's coming through the earth; and, little to no worry is needed to have this effect; the, light is more of a natural light; and, is not made by a filament burning; your, eyes has to adjust to perpetually; in, the year two thousand sixteen;

Lighting, in a lifehouse fluorescent wise; happens, via a deep insight into timescale; separated, by a fibonacci harmonic; by, several orders of magnitude; an, incoming north negative magneton packet as a photon comes in; and, excites atoms in the ceramic; which, are well below a femtometer in time;

## **Resonant Relaxation**

Actually, it is the summation of jc quantum; which, is in a liquid scale; all, is connected by; and, where there is a vibrational relaxation; of, excited north negative; to, a lower level energy state; that, is down on the level of a cotosecond; it, slows down from a jubb quantum to a cotosecond;

The, final process of the emission of a magnetic wavelength which is longer; such, is to be returned again of such a material to a ground state; a, stunning manifestation is occurred; of, an

interaction of magneton packets becoming photon as light; a, steady state fluorescence in microscopy; such, light is applied in the future; very, sensitive emission profile and spatial resolution is existing; as, a result of this insight into jc quantum; and, such is applied in colloidal biology; in, the year four thousand twenty-six;

This, researcher applied fluorescent microscopy; for, every element has a magnetic moment; a, north negative potential energy exists; and, a symmetry of north negative spin state; and, such can be divided into vibrating and rotating energetic level; bonding, orbit of atomic nuclei; such, a ground state is existing of molecule in a north negative magneton singlet; which, all north negative magneton are spin paired; meaning, phase conjugated;

All, this occurring at ambient room temperature; lifeceramic, internal energy state is existing in a state other than its lowest vibrational level; of, its ground state; and, light is emitted from the ceramic; and thus, such excitation is emitted from this excited state; existing, above the lower ground level state this ceramic is existing in;

A, transition occurs that results in fluorescence; fluorochrome, in the ceramic is conjugated to a larger macromolecule; as, organic matter is; like, nucleic acid; lipid, and enzyme and protein; a, fluorophore exists as absorption of magnetics is; forms, covalence in bonding of element; and, such in the year four thousand twenty-six is known in a broad class of materials;

Some, known today are called intrinsic and extrinsic; aromatic, amino acid is applied in the ceramic; is, an example of intrinsic fluorophore; and, modified bioenzymatic reaction of lifecolloid in the ceramic provides extrinsic fluorophores; and, such produces fluorescence with specific spectral color and property;

## **A Bag of Hot and Cold is Stored in Earth**

Turtle, told Two Feathers; and, Two Feathers told Cloud Two Children; and, Cloud told me this story; of, how a bag of hot and cold was put in the earth for the people to use; it, was as Cloud passed on that this is a time now we're living in our fifth sun; yet, it was a very watery sun before this; and, there was little to no light or dark; all, was just very diffuse;

That, was a very very long winter; everybody, saw that the sun was hiding and wouldn't come out; and, the other thing was that it never stopped snowing; and, eventually the sky was quite black; and, the earth pretty slippery underfoot to walk; and, cold; and, the beloved were really freezing; and, starving too; even, four leggeds; wingeds; and, it was just only fish and other water creatures that attended; and, the animal agreed that everyone was really suffering; seriously, a lack of heat and warmth; and, that winter was just going on and on and on; and, so

One, day a brave scout came called red dog; and, told everyone that no bears had come down to the council; and, it was noticed by all there also attending the council; that, actually no one talked about it; but, no one had even seen the bears for three years; and, some said "could the bears have some knowing to do with everybody's sufferedness?; they're, not at the council; possibly, it could be they're just keeping the warmth all to themselves"; said, some;

So, a search party was formed; to, find out; there, was a Looking Frog; there, was a Coyote; there, was a wolverine; a, bobcat; a, fox and a mouse; and, a dog fish; and, all went out to search for where the bears were; they, searched and went way out to where the land meets the sky; way, up high; he, small hole in the clouds everybody was lucky just to crawl through; and, everybody started looking around in the more upper lands; and, up in the highlands they finally come to a beautiful lake; a, beautiful dome with small swales extending out of the earth;

## **Visitors Poured Into the Small Abode**

Such, a dome perfectly integrated into nature; and, when they were just all in front of the house; everyone, could see it was really quite camouflaged; and, really wasn't easy to see at all; seemed, like it was covered over with a blanket of earth; so, the deer amongst them knocked on the door;

Inside, they found two little bear cubs playing; and, when they saw the strangers they were so excited; they said "oh my god! who are you?"; and, the fox replied "where's your mother and father?"; and, the little cubs replied that their mom and dad had gone out for a stroll;

Visitors, all poured into the little abode; and, saw that it was very warm and cozy inside; seemed, like the bears had it that what was outside was inside; and, you couldn't tell; beautiful, waterfalls; flowers, trees and plants; the, visitors looked around and saw beautiful lighting; gorgeous, kitchen and bathroom; and, bags, hanging from hooks;

In, a central arced ceramic pillar; and, the wolverine points at one of the bags; "what in dat bag?"; cubs, looked at each other; sizes, up the wolverine and says; "rain, kept in that bag"; then, the field mouse amongst them; inspecting, everything up close says; "ay, what about da udder one?";

Again, the cubs looked at each other; and, size up the field mouse; and say "well that particular bag is actually full of cool wind"; the, fox started to get a bit fed up with all this questioning; and, the fox says "ay...and what about dat one, over dere?"; cubs, looked at each other; size, up the fox;

Pull, their chins in and raise their eyebrows; and, they both said together; "fog, is sure as hell kept in that bag"; and, the wolf is seeing that no one is really getting to the bottom of things; and, he says "what about dat bag hangin' over dere lower down?"

## **The Wolf Was Getting A Bit Impatient**

Now, the cubs finally look at each other; and, appear like they're holding their breath for a moment; "sorry," says both of the cubs together; "now, that bag....that's a secret in there; but, our parent can tell you; and, they'd be sure glad to share it with you; if, you'd be able to wait around for a little while"; the, wolf was getting a bit impatient though; wolf, wasn't

Gonna be waiting around; he, said "listen up now; we're friends; how come we can't just take the bag?"; "what's, in there" said the cubs; "is, something really special; that, mom and dad really care to share with you"; "what's, in there?" interrupted the fox; "that, bag is where heat is kept inside" said the bear cubs; and, so

Then the mouse snatched the bag; and, said "thank you little bears; you've, given us what we were looking for"; and, all the animals took off with the bag and went to form a council in the bush; and, they all realized that because they had just ripped off the bag;

They'd, have to be a bit outside; because, they had to get back to the world lower down; and, in just quick as a flash it was; that, everyone turned to see the bears come running; and, the bears were holding up their cubs; the, bears said "this, is your children; we, are your family; let's, live together";

## **Bobcat Felt Disturbed**

Meanwhile, the bobcat felt a bit disturbed by everything; and, led the bears a little deeper into the forest; and, took off with everyone else with the bag of hot; and, whatever message was inside it; meanwhile, the other animals came and found where they had stowed the bag; before, they went down to the world below; then,

Took off with it; pulling, and tugging on the bag; and, then the bears jumped into the canoe; and, paddled fiercely after their bag of warmth; “hurry” said everybody; “the bear’s catching up with us quick”; and, when one of the animals got tired they passed the burden on to another;

Eventually, the bear would find where this was; and, the smaller animals would have to pass this on to the bigger animals quickly; just, keeping it out of the bear’s reach; until, finally everyone was exhausted; and, the only ones remaining fresh was the pike and the dog fish; and, they finally pull this bag of warmth through the gap in the cloud bank; and, it slips back down into the valleys; where, the clouds are; then, the whole party slips through after them;

As, soon as they were down there; they, couldn’t wait to open it up; and, it was opened and heat rushed out in every direction; melting, the snow and ice; and, dispersing the black clouds; and, it was so radiant that it made a gap in the cloud bank; above, the mountain; and, caused the sun to shine in the valleys;

## **Inside The Bag Was Instruction**

On how everyone could put warmth in a bag in the ground; and, cold in a bag as well; and, use this as the bears had always; to, manage the cold; and, stay warm; to, be more in a higher place; rather, than down low where you could get flooded out; and, prairie dogs then took this to heart; only, building on the higher ground; and, building an open convection system that their little grass beds could never mold;

Anyway, it certainly didn't stop the floods from coming; but, a technology did come to be as a result; and, the floodwaters ever rose; and, at this moment there was a big tree; that, reached extremely high up into the sky; and, to save themselves everyone thought they'd have to climb up into this highest tree; yet,

Eventually the rains and cloud and water subsided; and, the lands drained of the water; some, said a giant fish could have drunk the flood; but, most thought that was a funny thing; yet, the land where we were now; some, of it had become more a mountain; and, earth had been raised by water; nothing, much was left;

Yet, spring comes again; and, the sun did come back; and, dried up all the water on the land; and, trees covered themselves with leaves; and, flowers again start to bloom; and, summer comes as a season of joy for all creatures; and, the deep insight of the bears about keeping a bag of warm and cold in the earth; ever, remained; storing, energy in the present season; for, the moment of the season to come;

## **Chapter Ten: Saying No To Plastic**

### **Saying No To All Which Is Nonecological**

It, was for me sometimes to be with Cloud; and, Cloud asked me what I thought about new materials; that, could replace plastic that had come to be; in, the year four thousand twenty-six; beloved, are using biodegradable materials; none, can understand the insanity of having a substance not biologically degradable; yet, a

Peter principle had existed back then, some, two thousand years ago; and, even mothers in africa were no longer breastfeeding their babies; they'd, been socially engineered stupidly to feed their babies from their packet; so, you'd see eventually movement like bam and jab; get, rid of usury; stop, using war to launder money; you're, the real estate; stop, trafficking beloved; stop, all pseudoscience;

Such, had phthalates; and, polychlorinated bicarbons (PCBs); strange, estrogen like compounds that were serious endocrine disruptors; and, in the tins the toxicity was rife; and, what was inside mostly was fairly deficient; deficiency, then had to be really toxicity happens; yet, in this year four thousand twenty-six;

Lifeplastic, is made by lifecolloid via fermentation carbons and lipids; such, lifecolloid store carbon and energy; and, more than a couple hundred unique monomers; can, be combined via lifecolloid; that, can from such give you the raw ingredients to provide unique properties to such lifeplastic;

Such, lifeplastic is biodegradable; and, can be applied in hot and cold conditions; and, hold substrates such; such, lifeplastic can have properties that has much higher melting points; that, cannot melt under the temperature of one hundred eighty degrees celsius; and, don't crack if below forty degrees fahrenheit;

Elastic, and stretching ability; its ability to keep itself together though it can be bent; such, lifeplastic has mechanical biocompatibility; and, can be blended and modified; to, change its surface for it to be not ever able to absorb oil; or, water for instance; and, by combining such lifeplastic with other enzyme and organic material; one, can much surfaces for such countertops and food prep surfaces; which, has far infrared element within it; as, the lifeceramic dose;

Lifehouse, sustainable community produces such via lifecolloid from lifecolloid probiotic; that, produce polyhydroxyalkanoates; a, life organism such as *Alcaligenes eutrophus*; and, other lifecolloid; when, fed nutrients it multiplies rapidly; organisms, are then fed nutrient composition to synthesize polyhydroxyalkanoates; such, can be at least eighty percent of the lifecolloids dry weight;

Biosynthesis, of such is attained via nutrient that is reduced in phosphorous; nitrogen; and, various trace elements; and, where oxygen is cut off; and, where there is an excessive amount of carbon; and, multiple esters are contained that are highly refractive granules inside the lifecolloid; and, such depends upon the lifecolloid; that, you've cultivated such conditions; unique, homo- or co-polyesters having unique hydroxyalkanic acid is present; and, polyhydroxyalkanoate granules are recovered from the lifecolloid;

## **Lifeceramic is Made Out of Lifecolloid**

Malt, is easy obtained; which, has an enormous amount of carbon; and, doesn't really have much of a cost to produce; enzymes, within jubbs lifecolloid probiotic assist with pha synthesis; such, key enzymes of pha biosynthesis apply coenzyme A - thioester of  $\alpha$ -hydroxy fatty acid substrate; two, sizes of fatty acid; a, short and a medium chain arises; hydroxy, fatty acid is of a short chain; and, you can have three to five carbon atoms;

Lifecolloid, including *Aeromonas hydrophila*; and, *Thiococcus pfennigii*; participate, in a whole range of short and long chain fatty acid synthesis; such, jubbs lifecolloid probiotic organism has enzymes; and, in an environment where nitrogen phosphate is depleted; enormous, amounts of substrate is produced; that, you can use to make lifeplastic from; for instance; three kilos of malt can produce a kilogram of lifeplastic;

Polymers, are processed in conventional plastic processing equipment; and, depending upon composition some are more elastic; and, ductile; for instance, homo- or co-polyester; containing, hydroxy fatty acid is uv stable; versus, polylactic acid; and, can withstand temperature up to one hundred eighty degrees fahrenheit; and, have low water permeability;

Crystallization, can be close to some seventy percent of the material; lifeplastic, is like a ceramic in some ways; and, its processability and flexibility can improve; as, valeric acid can be smelt; its, slightly unpleasant musty pungent odor; lifeplastic, is extremely resistant to moisture and has aroma barrier property;

Polyhydroxybutyric acid causes stiffening; and, brittleness; and, that lifecolloid produce substance that is more of other fatty acids; great, flexibility and elasticity is present in such lifeplastic; the, point here being straight away make substance that is biodegradable; and, is assisting cause what is being held to be preserved; and, brings more life force into its contents; and, causes you to have a natural selection of more materials that a lifehouse can be made with;

## **Natural Paciferin Properties Applied**

In, lifehouse and lifeceramic natural paciferin is applied; In, the year four thousand twenty-six; the, woody parts of a cinnamomum camphora tree for instance; and, its essential oil applied; such, has a sweet woody beautiful floral aroma; and, some have like wild beronias in tasmania;

A, high percentage of linalool; which, are rose and jasmine like notes; naturally, occurring linalool can be found in nature; just, depending on where you are; botanicals, of such can be found on all continents; it, happens that some plants can have ninety percent of its oil as linalool; such, is extremely beneficial; and, causes you to have a deep night's sleep;

Linalool, induces relaxation; and, revitalization;and, as it is applied into lifeceramic and lifeplastic; such, becomes imbued more with this natural paciferin property; to, ever guard against spoilage in food; apart, from aromatherapy use here; you, have analgesic; anti-convulsant; anti-mold; calming, forces radiating to you from the material of your home;

Substances which is aphrodisiac in it's calming effect; vitalizes, your immunity; and, relaxes you to be able to be recovered and repaired; and, dissolve stress and tension; you're, left feeling energized instead; fascinating, aspect of the lifehouse is that such is integrated into nature; fully, in its design;

One, is aware of an insect plant interaction; and, how such extends to a connection we all have with each other in our health; all, these beloved as insects and plants; also, receive magnetic energy and have sensation of such; which, can be cared of connection with this beloved; and, otherwise no magnetic reward is given to you;

Your, body can not be so in your being purified; yet, in your

mindfulness you're able to maintain ever more resonantness; and, be in i awareness; applying, whole brain functioning patterning;

## **Applying Tenet in Whole Brain Functioning**

Adepts, of this Toltec tradition are able to have implicit and explicit mind reading technique; and, apply predictive programming; embedded, commands; and, submodalities to send a communication out; and, have this be received; all, applying natural laws of nature; you, have to know how energy is sent frictionlessly; without, any energy; such, is always spun; plasma, is the fourth state of matter; and, in this age of aquarius this is applied for extraction of gold and precious element;

I, know that i am only giving you such a small amount of information; and, it can take more than just this first work to cause you to be ever more complete in yourself; for me, being with Cloud it was finding out about Cloud's one teaching; and, that was about heaven; that's all; Cloud, got to be ceremonial chief because of this one teaching; amazing, how one teaching can be far better than ten thousand; heaven, is between two children who are playing;

It, was for me being with Cloud; to, feel an expansion of space behind the back of my nose; and, a warmth of the heart spreading through the chest; up, into the head; and, how my inspiration always i observed i was conscious more of; and, how such was always very lengthened; in, relation to how it ordinarily would be;

Cloud, only ever spoke with cholalic sound and language; which, energized your brain; Cloud's, story always causes you to become more timeless; and, valued more of your timelessness in your being; you, could feel more your playful beingness in yourself; on, the way back to the ranch house from chocolate pond; cloud, looked over the landscape and said;

“The, vast majority of what you can see before you; was, applied just to feed cows; it, was cleared for this few paltry pounds of flesh”; that’s, all changed now because most having stopped farming flesh; and, have assisted cause the trees to be growing more in the field again;

There, was an ancient civilization four thousand years ago; called, the bird clan; building, mounds on the mississippi flood plains; traveling, inland using waterways; trading, rocks; fashioning, stone; chipping, away; like, images of themselves; and, the birds and the fishes come together in this estuary; four, thousand years ago; and, they left this earth behind; same, way they found it; four thousand years ago;

## **Immaculate Conception and Childbirth**

In, the year four thousand twenty-six the beloved are looking back; to, note that some two thousand years beforehand; there, was a movement of i awareness; and, the beloved learned how to have children be born out of a form of discretion; Cloud, said all knew how to sense fertility from signs that could be read; and, was explained to all; there was more than just two genders;

Not, all unions were about sexual relation; and, Winnoc and Birdoc were the most prized of all those cared to have beloved in their camp; that, had skills that were very balanced; in, the southwest Cloud said that both Turtle and Two Feathers travelled to; across, turtle island; and, the Zuni or as Cloud said they preferred to call themselves the Koyemshi; Two Feathers, called them mudheads; though, in english stories cloud told me about of the mudheads was of intervals that would be between ceremonies of solemnness; which, was exalted by dancers that were masked and costumed;

The, hiyoka was the trickster; was, the clown; and, information always was delivered more through the clown giving you deep insight; and, what was rigid could have been made ridiculous; yet, such cloud said was often at the expense of the local missionary; and, people that came to visit them too; the

Costumes and the mask always in the ritual would cause the participants coming to be part of the ceremony to feel even sometimes a little frightened; then large, ever graceful movements also showed a readiness to cause those witnessing; a, feeling of cosmic counterpart of solemnness; and, such an underscoredness within the duality of the life of those who were within such a village; i, would learn to conduct Yuwipi ceremonies where light is brought into the dark;

Performance, in such a ceremony was the creation of a seeming state of sufferedness and urgency; for, those in a high pitched wailing sound song; that, would all of a sudden be broken with silence; and, each within the ceremony had opportunity to communicate to who was wrapped in the center; and, laid down as the shaman;

Dwellings, were in the ground more because coolness was; and, such dwellings remain temperate all the year; and, it was they have a story themselves that a long time ago; the, mudheads weren't as bright as they are today; and, Tunka Shila came amongst them; gave, them instruction on children being born as a form of discretion; in, their community;

Ladders, and steps were shown to them; and, how they could go back into and come back out of the earth; at, first when it was shown how to climb the ladder up and down; one, beloved tried to go up the ladder feet uppermost; more, standing on the head; another, tried to climb on the back of the ladder on the inside of it; others, didn't quite use the rungs right and feel through them; and some got caught up in the rungs; and, just weren't able to do it;

Tunka Shila tried to show them how to do it; and build a lifehouse; and, perhaps anyone could just imitate these actions; such a lifehouse was built from the inside out; and, was made to be as the inside was outside; and, nobody know if the inside was outside; some, made houses in the beginning that broke down; and some built themselves in and had to find their way out; and, some made bits out of sand where the sand has to collapse;

Tunka Shila, just showed really simple things; like, how to make some chairs; and, how to mix up a beautiful lifeceramic; everyone, cloud said was equal to each other;

No, such thing was incurred of any show and tell of the wuf society that existed in the two thousand years before this moment when everything has changed;

The, ovulation cycle for our sisters is just a clear mucus discharge at the end of such; and, a great energy is saved because such a red blood corpuscle that ordinarily if toxin was there wouldn't have been then re-absorbed so nutrient of such can be re-absorbed;

Tunka shila showed the mudheads how to copulate; there, was a very fat beloved that hadn't had any other beloved for a long long time; and, a couple of others also stepped forward; tunka shila, instructed; and, practicing and everything happened; and, no one was to have any mind just to be lifted up and bent over in copulation was a very simple way;

Tunka shila instructed this should happen more as dogs; everyone thought that was a bit funny; cloud, never left any subject matter out; the, mudheads all really wanted to give it a go; but, many didn't really even know where things were; then, children then more began to be more born out of a form of discretion;

Tanka sheila finally gave the message that all was given up on you; and, the fat beloved looked on just laughing; such, a story cloud said was told during hiyoka dances; and, trickster pantomimes; in, the pueblos by the Zuni originals; and, Cloud had many stories that was told by Turtle to Two Feathers;

Children, back then were born in the caul; that, is a natural birth; this, is where the amniotic sack is kept intact until the shoulders are bore; and, at that moment because the little beloved is being hydraulically moved; into, a position of slipping; no, pushing is really needed; the, body just naturally expels; the, beloved just slips out and birth is more orgasmic; and, clitoris is stimulated so that it's pleasant; yhe, new baby beforehand has crowned; at that point the

Expecting, mother can be in water for some forty five minutes; then, the baby simply slips out; doulas, today some have been trained in such a method; and, the health of our sisters; and, importance of the sanctity of reproduction be cared for; to be

Remained, immaculate; it,means that one has got out of the way; and, allowed nature to take it's course; some, discretion is taken in children being born; because, of act of expression and being of each other; is, incorporated around the knowledge of a moment of fertility;

As, her fluids become stringy; such, is evidence of her being fertile; and, in moments such other means of expression can be; for, those who are engaged in intimacy; consumption,of lifefood and applying jubbs cell rejuvenation; ovulation, cycle is marked out by a lighter menses; to, eventually become just spotting; to, eventually just become a clear mucus discharge at the end of the cycle; and, fertility is kept throughout life; y

You, must have your gonads to have proper levels of energy; and, not to be afraid unnecessarily; fear, of the snake is what kills not it's poison; cloud, talked about you being in up time; and, for this you've had to quieten down and have no internal dialogue; it, was quite a struggle for the originals; over, a long time it hasn't completely been healed up at all; all, of the originals can still be found crying; that, their children were taken away from them;

Even, one savage in the bush; and, whoever is on the throne really is fearful; yet, such leaders as the presi was; and, other known braves as bobtail Horse of the cheyenne; were, faced with a mission in life that such brave people gave that their kin could be better off; it, is not that fear doesn't exist; yet, \

Unnecessary fear doesn't; braves, ever weary of civic confinement and entrapment; two, thousand years ago; remember, you're looking back from the year four thousand twenty-six; path, of least resistance was taken; there, is no such thing as accepted death; as, an affirmation of life; yet, one can hold things dearly; the, sun the air the water; the, crickets and the animals close by;

One, can truly only honor such a beautiful spirit; only, this empty space is what is forever; all, else is temporary in comparison; all, of nature recycles; something, is universal and not individual; yet, is it alright you standby; and, there'll be a thousand elephants less this next twelve months;

Is, it okay with you beloved are without their children? you, live in a communistic system and no common law exists; this, federation of united nations; is, because this specie of wo/man; has, energy within the heart; and, is not definable; which, collectively we have all; from, celebration and from realized common fate; such a

Beloved's heart, is found in a federation of united nations; and, such a federation can live; stories, told a long time ago told of white jail bars; coming, to entrap the sky; and, all for a disastrous consequence; arrival, of corpse being put above all who can perceive; was, the end of the buffalo; and, an entire way of living;

Yet, you as a savage isn't disappeared; and, an i aware matrix is original; and, is innate within you; yet, what's old is shed; looking, back on this day it was that some had no idea about a sustainable future; and, at that time was only beginning to have an insight into lifefood; and, the beloved has passed through five suns; this, being the fifth sun of time in our oral tradition;

Everything, is saved because of the tick of a pen; a, moratorium was had; all, find out that the service provider had committed heinous crime; and, couldn't be a service provider; nor, did any beloved care to have a service provider ever again; all, became serving the servants servant; yet,

i awareness comes to be; and, economic egalitarianism too; for, a voice was heard; which, said “stop” to harm; that, was obviously being done; a, very amazing medicine person has a fantastic vision; where, all live again in an i aware matrix; canopy, is put back; lifefood, becomes shade grown again; such

Awareness of this medicine beloved remains to this day; because, what’s enduring to this day; for, the beloved; is, waking up to a corpse having been put above their heads; that’s wrong; and, a bank that’s directing currency only having been in lalaland; and, what the founding fathers cared for; that a, wo/man was in some office; only, such an office existed and slavery was; and, the movement was toward all being more verifiable; and, only considering autographs that were wet; this

Great medicine beloved said that as you see people dancing together; in, a single harmonious space; a, peaceful world for all is coming to be; and, lifefood agrarianism and jubbs cell rejuvenation is applied in the year four thousand twenty-six; all, have a deep insight into colloidal biology; and, whole brain functioning; and, the use of phytonutrient;

You, should know that an enormous number of herbs and spices contain cannabinoids; and, such is not a drug but a nutrient; in, the year four thousand twenty-six people have lost all their superstitious reasoning; that, only came about back then because of negative economic inductance;

Cannabinoid, and anandamide; interact, with the body’s regulatory system; today, such is known as an endocannabinoid system; such, is a compound and receptor mechanism that’s engaged in homeostasis; in fact, it’s only that you have such that you can have vital health;

Some, plants have a ultrative effect and can be applied on a regular basis; as, being non-toxic; many, such act as adaptogens; and, originals here on turtle island have numerous plants that contain therapeutic cannabinoids; including, echinacea root and coneflower;

Frank Fool's Crow, and others would always put some echinacea root in the chanupa; such, was known to relieve symptoms of anxiety; headaches, and other body armor; all, which are symptoms eased by cannabinoids; many, plants as indicated contain cannabimimetics; such, in the echinacea plant is known as N-alkyl amides; and, interact with CB2 receptors in the body; such, is very powerful in assisting with modulating inflammatory and immune response;

A, psychoactive component is the primary stimulant of a CB2 receptor; and, is effective in acting as an anti-inflammatory antioxidant; plants, like electric daisy blocks and stops toothache; that, has n-isobutylamides; which, is a very powerful reducer of pain and inflammation;

Helichrysum, contains large amounts of cannabigerol (CBG); such, is an amazing antidepressant; and, assists to help stabilize mood; Cloud, instructed me to only apply natural remedy; period; synthetic toxins were definitely not considered to be anything but a poison; period; and, that things should really be cold extracted and not isolates; because, things are more whole and are assisted if combined together;

Liverwort, is another plant on turtle island containing cannabinoids; perrottetinic, acid is very similar thc; and, acts on the CB2 receptor; and, was used by the originals for all sorts of conditions; such, medicinal lichens have very powerful value; cocoa, contains theobromine; and, in small amounts interacts with the cannabinoid system;

Compounds within the cocoa bean have been shown to interact with enzymes in the body; and, such is necessary to clear the endocannabinoid system from molecule when it's spent; and, so it's an anandamide inhibitors; anandamide, as indicated is an endogenous cannabinoid compound; element, in chocolate assists de-activate such; which, is why when you eat chocolate you are not going to feel any effect necessarily of the cannabinoid; the

Cocoa plant itself contains empathogenic compound; that, create calm and cause a person to feel more in love; and, maybe you'd be surprised to know that black pepper also does have cannabinoids; cannabis, often tastes peppery; and, such really is so because beta-caryophyllene (BCP);

An, aromatic compound of black pepper which is a terpene; and, also attaches to the CB2 receptor; maca, rhododendron are also plants containing compounds that stimulate and engage the endocannabinoid system; such, is certainly not a drug; and, in the year four thousand twenty-six much knowledge of our body has been gained; because, of this one plant being studied and applied;

## **A JC Quanta In Magnicity Explains Universe Essence**

Galaxies, are held together by magnicity; perhaps, you should take the time to learn more about such; yet, you should know that the universe is composed of forces; that, are, spinning up and in; and, down and out; an neutral; and an A and a B field exists; your, brain and your body works as a wet cell battery; providing, you've got plenty of north negative potential;

As, you have hemi-synchronization from whole brain functioning patterning being applied; you, have a greater amplitude of magnicity available to you; energy, is present to run your body; most, all of it comes from zero point; and, tapping the vacuum;

It, was not uncommon for Cloud to engage in conversation such that it was for me to become aware of what was known; it, wasn't for me to have to reinvent any wheel; Cloud, would hold me entranced in a gaze; until, this medicine beloved had completed a thought; Cloud's, face was the face of ease;

Cloud, said that upon death one can experience what some today call the bardo state; that, ray that you actually feel is a ray of this quantum; connecting, all together; magnicity, can have extinguished and can have become discharged; and, flared off as a tare; mostly, after having over-breathed; and, one, not having kept their proper levels of carbon dioxide;

Cloud, made things with hands; beautiful, medicine items that were passed on and given to beloved; such, would act as an anchor; and, trigger some state Cloud had given in an induction; Cloud, had me learn from Frank Fool's Crow early on how to be able to read what a dream might be; as, a vision some beloved could have;

Crying, for a vision; Cloud, and Fool's Crow could both tell you what the vision would be; many, days before some visioner would go to have a vision; crying, for a vision; and, going on a vision quest;

Was, good training and so was many practices; as, going without one sense to enhance the others; cloud, always greeted everybody; and, prided self to be the first to do such when any beloved came; Cloud, would get down to being lower than anyone else's eyes generally; most, would be looking down; all, was always put to be a little behind and below; than, above and in front;

Element, in any system that is the controlling element; is, always the most flexible element in the system; and, intelligence is what you have to go beyond any prefix set pattern of response; to, have been able to survive; and, when you look back a couple thousand years to this day; you're, looking with an instrument of perception that is allowing you to perceive whole brain functioning; where,

People a couple thousand years ago had no insight; until, i awareness and whole brain functioning began to become taught; yet, all wasn't until economic egalitarianism came to be achieved; in, the year four thousand twenty-six all are living as the adirondacks did; some, many thousands of years before as originals; all, were lifefoodarians; and, lived the longest life; and, cared about all of life; living, the most sublime life of all originals;

All, life in this day is considered sentient; and, gender egalitarianism is a norm; can, you remember that the wind is whispering sweet nothing; and, that what's said is modifying something in the moment for you; that's all; all, stuck states it is known in the year four thousand twenty-six; occur, because of a sensory system deletion; and, that whole brain functioning involves a syntax involving kinesthetic; auditory; and, visual; sequencing, of the senses in this order; what's

Positive, is known to be of a plus one value; and, what's negative is known to be of a negative five value; a, new world view is taking shape; that's, unique from anything that's happened in the past; all, beloved are waking up to a condition having been imposed; not, truly much by knowing; but, by default;

How, you who is living is real and can perceive; and, what impinges within you is like a mirror reflection of you; not, you; you, are equal to another beloved; to, freely determine your destiny;

All, can say do you have the power to know what you can change; and, what you can't; everyone's personal power is controlled by a field outside self;

Freedom, is you being in your own self governance; it's, your property to move your arm; not, someone else's; all, entities and -isms are dead and have no central organized nervous system; and, at the moment you and i have a system which is where a fictional entity as an ism is dead; and, has no central organized nervous system; and, has been put above you who does;

Lifehouse, sustainable community is a concept that you can apply where you are; and, economic egalitarianism is too; in, nature a give and receivedness is; and, a free flow of passage and safe harbor; is, for all in a natural paradigm; no one, has the right to interfere with another's life; or, to have said you as a people cannot have your children; or, someone owns the land who's dead;

The, good news is that the path of least resistance is existing for all of us; to, have ticked the box yes; for, reform in banking; the, bank must be back inside who can perceive; for, it is the bank that's directing the currency; where, focus is being put; a, corpse can't think; and, can't spend from a central organized nervous system; nineteen, billion on basic education for the earth for twelve months; and, seven hundred fifty billion for war machinery of the military industrial complex; is, insane;

Some, small countries can spend close to that on ice cream; as, what's spent on basic education for the whole world; through, education social mobility occurs; the, roof is leaking and much conversation is about furniture coverings; mere, rearrangement of furniture in the upstairs room; right, now you can see young and elderly beloved; it's not for you to wonder of whatever simple appearances is; one, beloved is not unique from another;

If, you're fit you don't need anything; you, should assist me up front with the younger ones and those beloved who are infirm; i, am giving you my estate; i, am doing this whilst i am living; i, give you my autograph; this, state is given of my estate;

No one, has to be concerned much of anything individual; something, we share with each other we have in our hearts; we, have in common;

Causing, the greatest sufferedness on earth right now is not spiritual; that, any beloved can have been joined to be equal to what has no central organized nervous system; and, cannot perceive; on, this note a private guild owned by the hand above the government; of, all plantations on the earth; has, made all to be put under infractions; only, written for a corpse or a ment; an, -ism; but,

Not you who is living and can perceive; a fruit tree of victimless crime; where no injury is; no, damage no cost yet apparently a crime is? Yet, where is such? All targeted black hispanic boys put into detention should be let free; for it was definitely a witches trial that put them there;

Alphabet, soup land can't say anything; nor, can it hear you; your, focus being inside here now; at, a grassroots level; not, to have a service provider anymore; who, is caused one plantation to be over the whole earth; except, for a few orphaned countries; none, can say that war has not been fought because of banking; a, bank-whore; and, one can say one is who is under military dictatorship at the moment;

All, have acquiesced to that system only; yet, what's extremely incorrect is that a private person could own the money supply; and, everyone else would have to pay it back to that person only; no one, can say that's not slavery; especially, you and i we cannot accept a foreign entity to make any decisions for us; an, entity has no central organized nervous system; and, is illogical; irrational; and, insane; period; and, such is what is wrong at the moment;

It's, wrong that anyone could socially engineer others; which, is evil; send, their children to the public fool system; to, separate segregate and dumb down; and, no group; especially, an entity; should, ever be controlling the action of beloved in a manner of having fallen into civic confinement and entrapment; all, story is made up; it's, an approximation of reality; what, you sense is an approximation of reality; not, reality;

You, living as a savage prefer not to live with possessions; in, this moment now you are giving your possessions and assets to this movement; don't, sit idly by in your life; and, let the oceans just acidify; because, you've only allowed what's dead to be above you in what you've done; you'll, learn how to be nobody; not, somebody; learn; how to be part of a leaderless and headless movement; and, such is everywhere right now all over this earth;

You, are not alone; not, at all; not, a single cunt-tree beloved is not a part of this movement; there's, no medium between you and creation; you, reject all such; you, reject this idea that you're simply an observer; observing, some subject; no; the, whole universe is flowing inside you; there's, nothing for you to guard; what, power you have is invisible; formless; this, is power;

You, are ruler of no possessions to tie you down; you, are a savage; you, have nothing to guard; nothing, to betray; or, to be martyred; you,are not under any observation; that's, impossible;you, have great power to be able to reflect; you've, learned how to be nobody; you,conceal; all, what would be volunteered not positive; you, exclude the intrigue of opposition; you're, not interested in trophy of metal hunting; you're, simply interested in what can i do that my kin can be better off

You, apply all symbol to achieve this invisible good; for, you will not stop until the roof has been repaired from leaking; and,only upon constitutional currency being restored here on turtle island; period; you, have to know to get rid of anything that's not your own thought; and, get rid of any thought that's yours that's not beneficial; for, it is you who is the savage who is aware of a means; for, broadcasting voice command; the, heart is guiding the tongue;

I'm, asking you to come from an office of trust right now; not, profit; and, I'm making this appointment with you right now; in, this moment; i, want you to be my trustee; this, savage accepts all creed as beads on one string; and, it's this string of a blending of the heart and the mind in i awareness; this, savage is about; not, by doing anything except you're witnessing of this outward lived meditation;

You, don't have to ask anyone to go to the bathroom; and, because of this you are a force to be reckoned with; could, this be the reason the hand above; has, spent so much on psy ops operation; running, around organizing state sponsored domestic terrorism; every, bullet crossed over every boundary was paid for; if, you're a soldier your body is worth more than the property you're defending;

My, father didn't get shot through his neck and his legs; saving, american boys; for, a communistic pig system; you, are living in a cunt-tree as an orchard; that's, de-zioned for human resources to be stock; in, a corpse itself that's dead; and, you've got a few chrome domes running around up there; that, you and i are acquiescing to allow to be where they are; because, how can you have anything different if the bank is in lalaland; of, your currency;

Vanity, someone can have had can have helped the bank-whore a lot; yet, can you notice any vanity you can have; i, can tell you my son has been kidnapped; taken; the, joy dakota and i have is his and my property; not, anyone else's; you, live in a pig system where one apparently can't void a void court order; is, it okay someone can slowly put your child to death; to, tell you to stop speaking; and, mess with your life that you just go away?

### **Caesar's Praetorian is Alphabet Soup Land Today**

All, would arrive to see the culture that you have canceled and even logos dropped; for, never was the social compact not shredded; this, reason is for an article IV and III court; room, is for self autonomy not abomination by an "ISM"; all, is fascism by the controllers of CB-cowo the same as Caesars praetorian in the past which eventually killed caesar as well; such

A, conquest has always been over your title; it's, in the rainbow prophecy a strange attractor comes to be set up; to, engage autonomous dialogue; non-biased, without conflicted interest which is common law wouldn't you agree? To, this, end currency comes to be directed which is a top priority; because, its your title which is real otherwise you're under an "ISM"; an,

Illusion, of freedom; yet, in this story you learn about how the controllers of CB-cowo company infiltrate every level of society; by, currencies unprecedented centralized role being pulled away from governance by usury; it's the same as the praetorian as any alphabet soup land since; which, alphabet soup land is highly corrupt; where, we the people are just being portrayed; so

You, woke up to see ammunition storage incinerated moving into world war III; nothing, is left to defend taiwan; keep, in mind the company assassinated their own as caesar; the, common plot of CB-cowo is to own the state as a corporation; so, half a million would be dead in ukraine; and, a population of thirty-six million you would see most all displaced;

Keep, in mind poland use to be part of ukraine; ukrainians, genocided a hundred thousand poles from nineteen eighteen to ninteenfourty-five; not, just ethnic poles yet hungarians back then; who, were persecuted naified ukraine back then; for, the path of hollow bone is the tale of what happened to beloved in relation of genocide in the past and today; so, did soldiers ever get killshot before going to war in the past?

Was that not a way also having dealt with things in an asymmetric fashion of war? Might a story unfold here to you and within these volume that to be moor revisionary also ushering in a new epoch?

# Path of Hollow Bone: vol One

# Eclipse

Papers, such as the new york post is a pig's rag; bank-whore, agenda'd; are, you free of your vanity; you, can feel what happens to children when they are taken; as, young ones?; is, it alright they are gagged and drugged; and, can cry themselves to death;

Is, it okay that a machine is what's doing that? Not, you who can perceive; you, can decide the destiny of your own life; why, should you be asked to where your nose to the left; that's, legal and medical battery; that's, what's going on here now;

Nine, eleven and three eleven show you that there is a hand above the government; definitely; you, can't say this is not state sponsored domestic terrorism; period; all, know that it's completely immoral and wrong; that, you'd have a monopoly; everyone, reckons that's communistic and evil; yet, such is what we have; you, and i have been put to have a corpse above our heads;
